

Dear Customer,

Visionary Bowling Products, LLC. is proud to announce the availability of our newest ball called the Raven Invasion. This ball uses the Ogre HDC core, surrounded by the new Implex II Pearl coverstock. This coverstock is a formulation that utilizes the same great base polyols found in the React-A-Tack and Eradicator covers, but 2 new additives have been used to increase backend reaction, and it's ability to create traction in the oil.

The Raven Invasion can be used for all medium house conditions (med light to med heavy). On most house patterns, this can be used as a benchmark ball that can often times be used throughout the entire night without having to make huge adjustments as the lanes break down.
