

COLUMBIA 300 URETHANE

Columbia
— — — **U 300**
Urethane

When better bowling balls are built, Columbia 300 will build them. Today's uncertain conditions demand precision construction in a bowling ball, and you get it with a ball that is 100% urethane, with the inherent urethane problems virtually eliminated, a ball that rolls true, with no wobble, no internal component separation. Naturally it has that world famous Columbia hitting power built in.

DEMAND THE BEST. DEMAND COLUMBIA 300 URETHANE.
