

# "I love 'U'..."

"After drilling the ball I went out onto the lanes and proceeded to shoot 279 the first game I threw the ball. Two nights later using the ball for the first time in league competition I opened with a 300 the opening game!

... a friend of mine asked me which ball I would recommend... (I) sold him a U Dot and two days later in a scratch tournament he opened the tournament with 300 - 245 - 290 - 835 which was bowled across three pairs of lanes! This is the highest series ever shot in lower Connecticut and the lanes passed ABC inspection."

— Steve Schwartzberg (Greenwich CT)

"I have never thrown a better carrying bowling ball. On the drier conditions it will swing and carry, on slightly heavier conditions it will go long, and still carry."

— Jack McCarthy (Lydon KY)

"Ricky Lustig recently rolled a 300 with a Columbia ball... the new U Dot is a terrific ball."

— Bill Torkelson (Sioux Falls SD)

"Mardy Monson has raised his average in league from 203 to 220 in a matter of about six weeks.

12/10/84:	Miller Lite Major League	300
1/5/85 (sic):	American Family Insurance Tournament	300
1/5/85 (sic):	American Family Insurance Tournament	300

I have sold all of the other equipment that I own and use only the 'U' Dot now. My average has gone up and my tournament winnings have gone up, and I am impressed with the way the ball 'hits' but never over-reacts."

— Bud Gatena (Dubuque IA)

"On January 10, 1985, I rolled my first 300 game at (a local bowling center) which is noted for its tough and inconsistent lanes, but the Columbia 300 works wonders under all conditions. I have used many different bowling balls over the 25 years that I have been bowling, but none have come close to comparing with your new urethane ball."

— Angelo Corradi (Kelly Lake MN)
