

**WOW! It's raising more than just scores.**

In a word...**WOW!**™ Enough said when you experience the performance of the newest and strongest addition to the **Flipside**™ family. You'll find the **WOW!** will take quite a liking to heavy oil, and has plenty left for an aggressive **Flipside** reaction on the backend. It all starts with the new **UFO**™ particle, which produces **Ultimate Friction in Oil** — particle technology that's truly out of this world. Combine this with a medium Rg core that creates 4-5" of track flare, and you can leave your spare ball in the bag. The **WOW!** It'll make your hair stand up and pins fall down.

\*CAUTION! May hook too much "out of the box"...polish when needed.
