

# Live Your Fantasy!

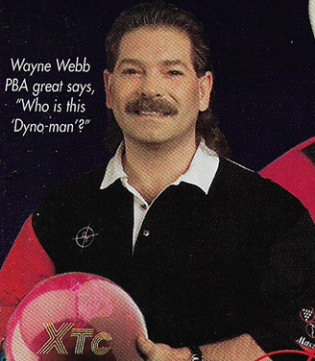

Don't just dream about it, make your bowling fantasy's come true with the newly designed and manufactured Concept **XTC**. Let Dyno-Thane make you a winner.... Bowl the **XTC**.

**XTC** The newest innovation from Dyno-Thane...  
...The leaders in gyration

ball technology. Our new hi density blow mold stacked core is designed for symmetrical control of core dynamics, for consistency in core density and easy drilling. The D/T stacked core combines the highest radius of gyration on the X axis of any DT two piece ball to get through the heads cleaner and a moderate radius of gyration on the Y axis for a controlled flip, moderate track flare and stronger roll.

We've wrapped our newest core with the DT explosive **POLARIZED** lipstick red cover stock to produce our **SPICEST** bowling ball yet. Results...a more usable ball on a wider variety of lane conditions and lane surfaces. **XTC**.... A sure winner

on the tour for professional DT staff members Wayne Webb, C.K. Moore, Bryon Smith, Tony Rosamilia, Bill Swanson, Mark Bradley and even league bowlers like Dyno-man.

Wayne Webb PBA great says, "Who is this 'Dyno-man'?"

**DYNO-THANE ENTERPRISES**

All Great Bowling Balls Have One Thing In Common The Dyno-Thane Name!
