

The Least radical thing about the new **Sunstorm** is its color . . .

Serious bowlers who know their strengths and limitations will find the **Sunstorm** to be the most powerful and versatile bowling ball created to date – by anyone. The **Sunstorm** urethane formula is the latest innovation from **HK Research** (the company that *invented* reactive urethane) and **High Score Products** (the company that pioneered its use in the bowling industry). This formula, in combination with an absolutely unique weight block design, delivers more raw reactive urethane power than any ball made. Not designed for the timid.

Sunstorm. A very aggressive bowling ball from
