Firebolt™

The thunder
keeps rolling on.
And on. And on...

Winning ball on
four PBA tour stops.

1985 Old Spice Open

1985 Pat Boone Open

1985 Denver Open

1985 Hammer Open

Winning ball, 1985 ABC Masters

Earl Anthony

Earl Anthony, All-Time PBA Money Winner. All-Time PBA Title Holder.

"Firebolt is by far the hottest urethane ball on the Tour. It performs even better than Ebonite's own engineers had expected. And for a new ball, that's tremendous."

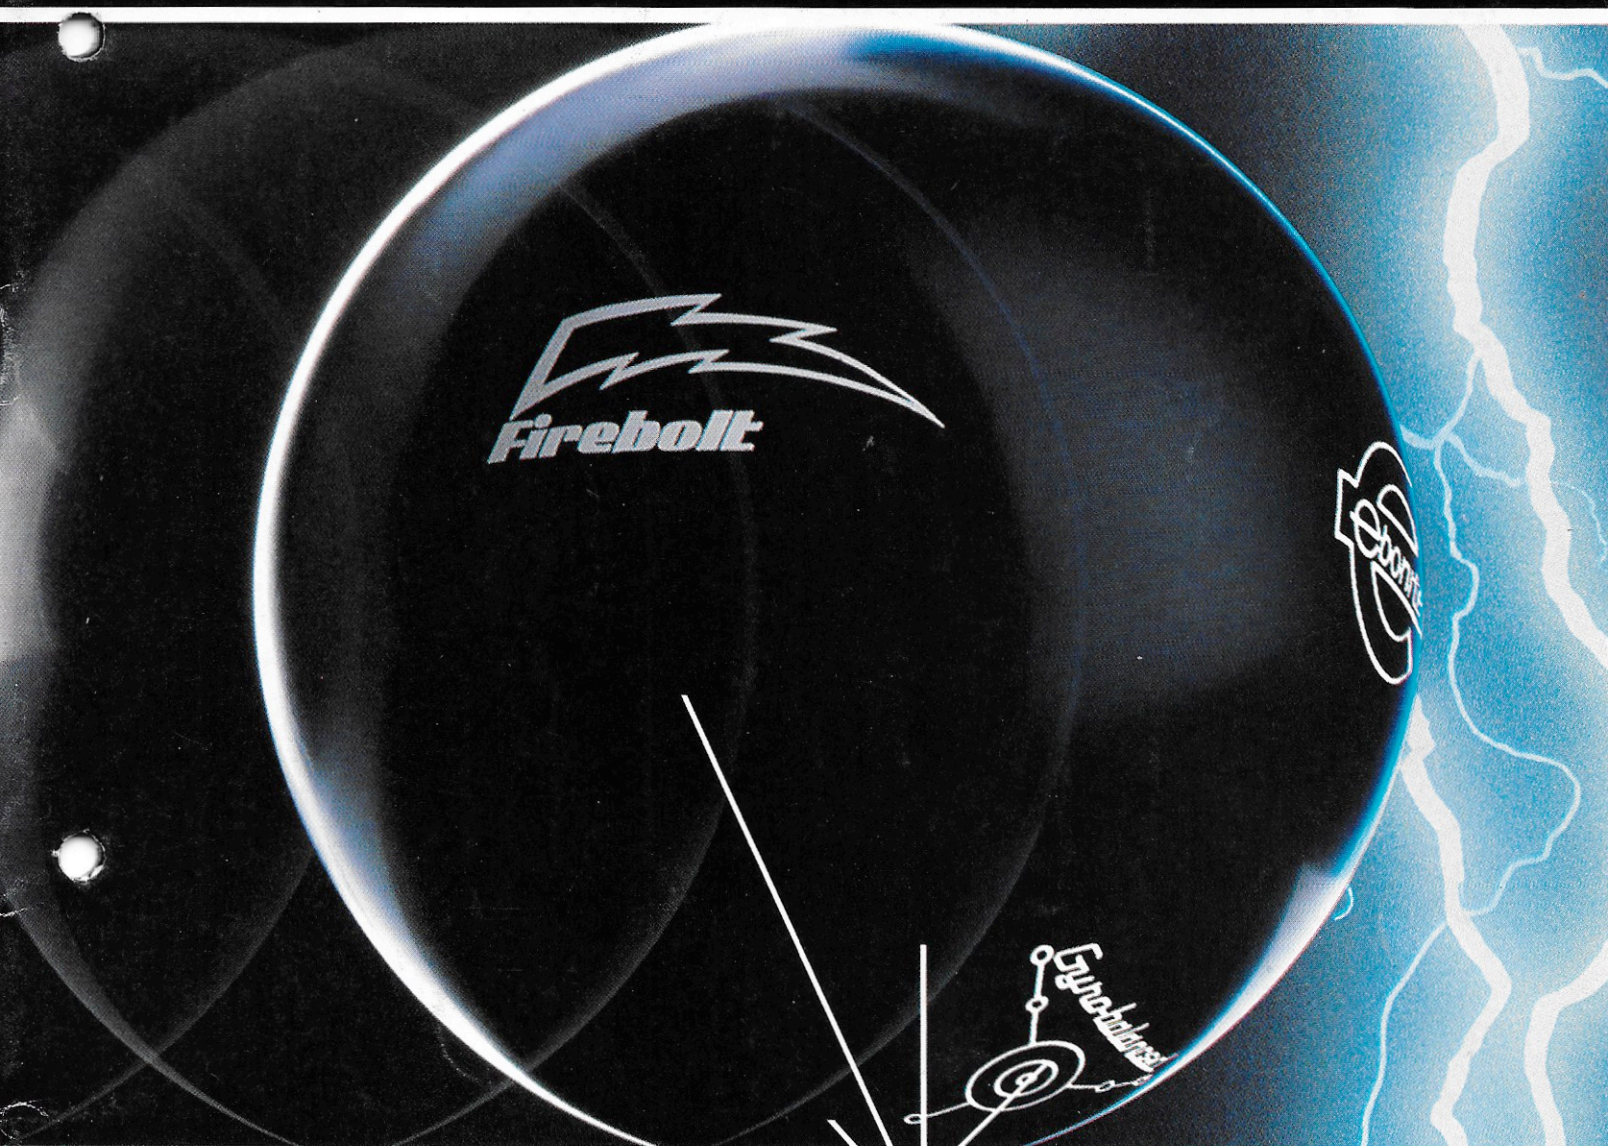

Meet Ebonite Firebolt, the Pro's Choice in urethane. With proven performance in five top tournaments, including the ABC Masters.

If you're serious about winning, it's the best weapon you can put on a lane.

EBONITE®  EBNITE INTERNATIONAL

The world's largest maker of quality bowling balls.

Now available for more lane conditions.

When you need a heavy dose of power on average-to-oily lanes, reach for the dull-surface Firebolt. It really *hugs* the lane so you get the control you need to "zero-in" on the pocket.

For average lanes, choose the shiny-surface Firebolt. It's designed to give you precise hooking and predictable, smooth roll.

Make some thunder of your own. With Ebonite Firebolt. The exceptional performance ball *charged* with extra urethane. Available in 14, 15 and 16 lbs.

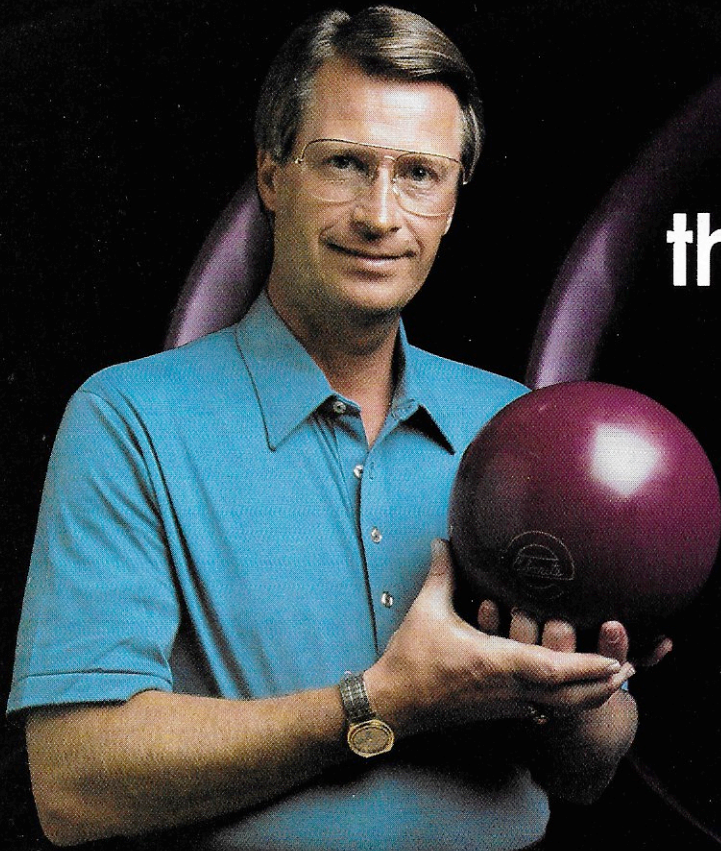

Earl Anthony

- The Ebonite Gyro-balanced® System gives your professional ball driller a perfect target for on-the-mark drilling.
- The remarkable Firebolt surface gives you a superior, lane-hugging roll for better control and hooking.
- Unique urethane shell has more urethane than any other Ebonite ball—a full 3/4 inch. That means you get extra power and carry-through because the pins stay consistently lower.
- State-of-the-art advances. A top weight, for example, that's located by Exactatron II™, a NASA-developed system more accurate than any other technique used today. And Firebolt's ultra high-density weight block means even more hard-hitting power!

MAGNUM[®] 12

Now with
thicker urethane...
more power
for heavier pins

Earl Anthony

All-Time PBA Money Winner. All-Time PBA Title Holder.

"I made over \$1 million rolling Ebonite Magnums. And now the best of the series is even better. Magnum 12's thicker urethane shell — a full 1/2 inch — gives you extra power to combat today's heavier pins."

EBONITE[®]  EBNITE INTERNATIONAL

The world's largest maker of quality bowling balls.

A surface that grabs average lanes like no other. And a thicker urethane shell that wreaks havoc on heavier pins.

That's the Ebonite Magnum 12. You get more control and more power off the pins than you've ever had before.

Magnum 12 was lane-tested by pro bowlers and pro shop operators—tough folks to please—and they absolutely loved the way this ball rolled and hit hard. So will you.

Put some extra muscle in your game with 100% urethane shell, 100% Magnum 12 Medium Purple Urethane. Available in 12, 14, 15, 16 lbs.

- **Magnum 12 meets exacting quality control requirements**—far exceeding ABC specifications.
- **Buffed surface design** gives you extra hooking power on average lane conditions. Helps you improve pocket accuracy.
- **Features the latest Ebonite innovations.** Gyro-balanced® with Exactatron II™ spotting and a high density weight block. Your result: a ball that fits better, rolls better, hits harder.
- **Extra-thick urethane shell** meets the challenge of heavier pins, keeps pins lower for consistent carry-through and explosive pin action.

GYRO1™

Number 1
in value and
performance

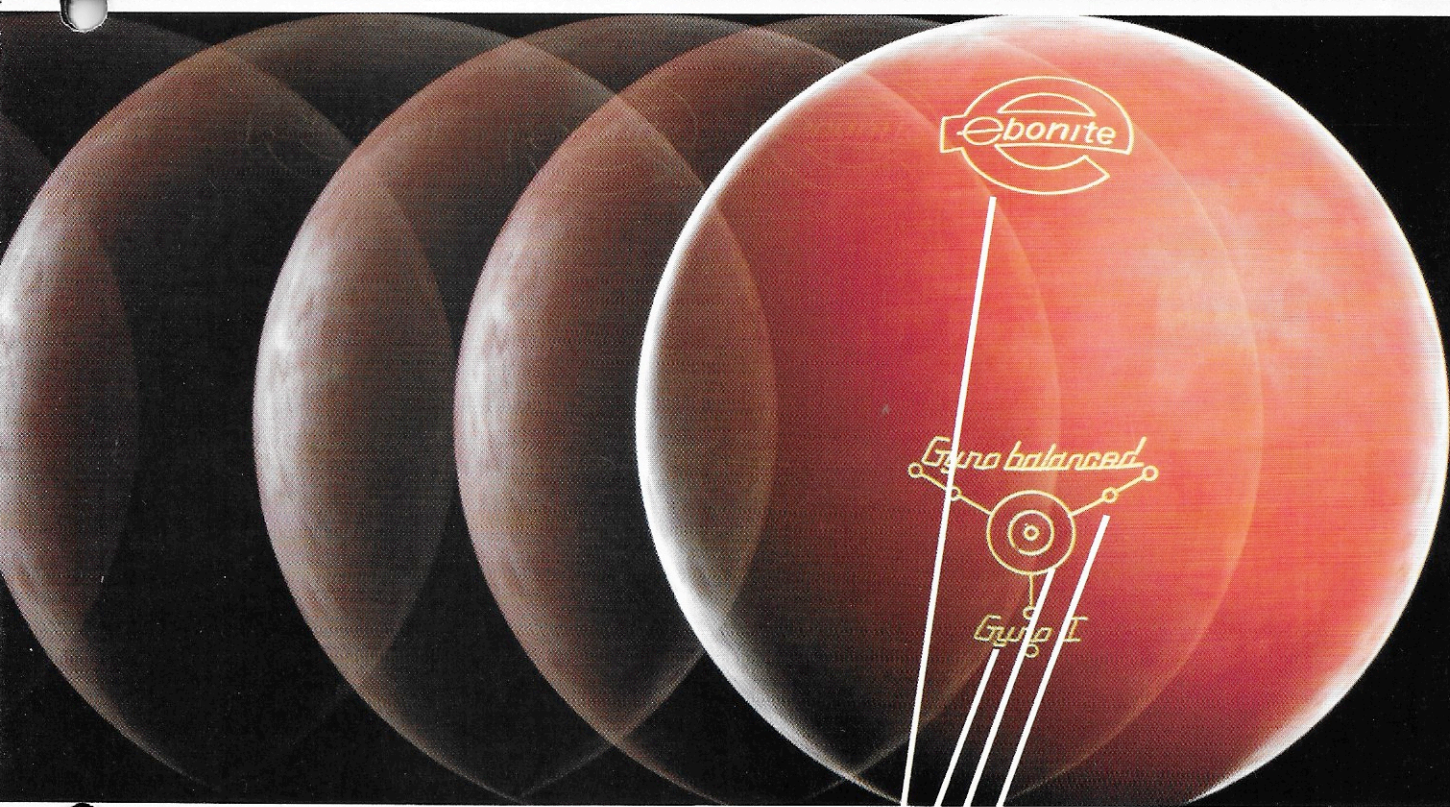

Gyro I—Polyester.

The newest member of the Ebonite Performance Family.

The all new Gyro I Polyester sets the standard for polyester performance bowling balls. Its full $\frac{3}{4}$ inch medium polyester shell wraps the same core found in Ebonite's top-of-the-line performance balls. You get the hook, control and carry-through of a top-of-the-line ball at an affordable price. And it's ideal for average lane conditions. In 12, 14, 15, 16 lbs.

The world's largest maker of quality bowling balls.

- **Gyro-balancing** assures precise weighing and spotting on every Gyro I Series ball.
- **High density weight block** places more weight at the surface, right where it's needed for even, predictable rolling and hard-hitting power.
- **Gyro 1 Series balls target-in** for specific bowling needs and requirements.
- **The Ebonite name** assures you that you're rolling a scientifically-designed ball that's built for performance.

Gyro-I—Soft Red Urethane carries a powerful punch on oily lanes with a dull finish and soft urethane cover over an all-rubber core. The best value in urethane. The perfect ball for bowlers taking their "first step" up to urethane. In 14, 15, 16 lbs.

RUBBER

PERFORMANCE SERIES

The right
choice for
performance
and durability

Magnum® 5—Hard Black Rubber—High luster finish assures top performance on dry lane conditions. All-rubber core and high-density weight block for easy release and predictable roll. In 15, 16 lbs. 

Magnum 10—Soft Black Rubber—Dull-porous surface design features a remarkable surface additive for real gripping power on oily lanes. High-density weight block over a rubber core. 12, 14, 15, 16 lbs. 

EBONITE 
EBONITE INTERNATIONAL

The world's largest maker of quality bowling balls.

Gyro™ 1-Soft Black Rubber—Medium surface for better control on average lane conditions. All-rubber core for easy release. A ball that combines hook and control. Perfect for the league bowler who owns only one ball. In 12, 14, 15, 16 lbs.

Gyro 1—Medium-Hard Black Rubber—High luster finish for maximum control on dry lanes. All-rubber core and high-density weight block gives you a ball that rolls true, hits hard. Built for durability. 12, 14, 15, 16 lbs.

Maxim® IV Supreme—Medium-Hard Black Rubber—Durable construction and a popular price make this ball a favorite with league bowlers. Exactatron II spotted for perfect balance. In 9-16 lbs.

- **Rubber core and high-density weight block** on every Ebonite rubber ball assures easy, sure delivery and smooth, even rolling.
- **Gyro-balancing** on Magnums and Gyros gives your professional ball driller a perfect target for accurate drilling.
- **Ebonite's exclusive Exactatron II™ system** uses the latest aerospace technology to insure proper weighing and spotting on every Ebonite rubber ball.
- **Superior construction** gives you the utmost in power, control and durability.

MAXIM IV[®]

SERIES

Now
fun comes
in eight
exciting colors!

Maxim IV Polyester—The bright, brilliant colors catch the eyes of everyone in the league. But Maxim IV's real beauty begins with your first roll. These balls are built for performance, with high-density weight blocks and medium-hard covers that *deliver* on dry and average lanes. Because it's so much more fun when you win...

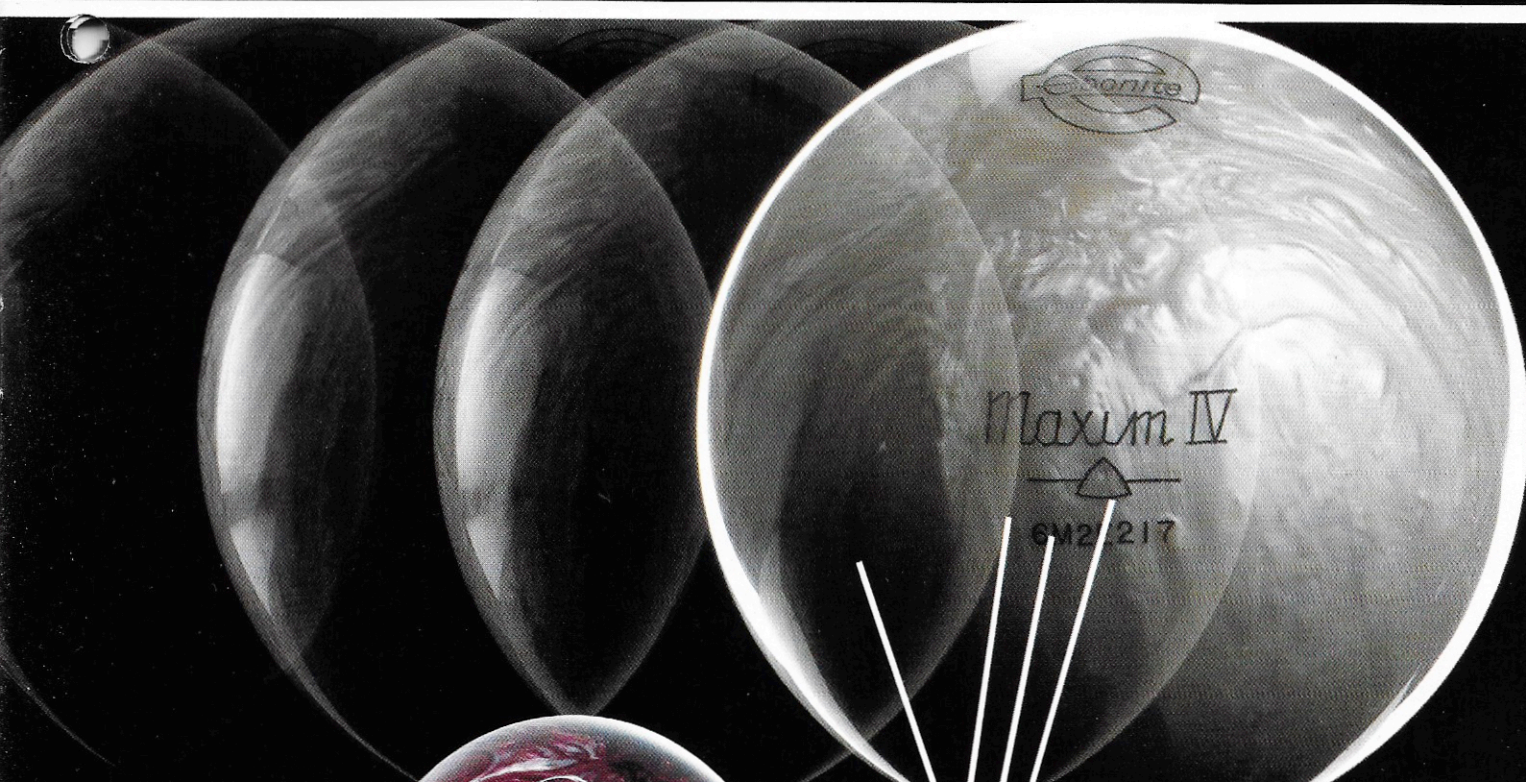

1. Royal Blue (8, 10, 12, 13, 14, 15, 16 lbs.)
2. Grape/Silver (8, 10, 11, 12, 13, 14, 15 lbs.)
3. Coffee 'n Creme (8, 10, 12, 14 lbs.)
4. Pearl (8, 10, 12, 14 lbs.)
5. Honey Sparkle (8, 10, 12, 14, 16 lbs.)
6. Blue/Silver (10, 12, 14, 16 lbs.)
7. Gray/Pearl (8, 10, 12, 14, 16 lbs.)
8. Strawberry/Silver (10, 11, 12, 14 lbs.)

EBOONITE[®] 
EBOONITE
INTERNATIONAL

The world's largest maker of quality bowling balls.

- Maxim IV's triangle spotting provides an ideal target for professional drilling accuracy.
- Features the same high-density weight block and easy-release core found in Ebonite's Magnum® Series.
- Top weight, gross weight and center of top weight are measured by Exactron II™, Ebonite's exclusive weighing system. Assures a perfect balance.
- Specifically designed to give average bowlers a full measure of performance on dry-to-average lanes.

ACCESSORIES

You'll feel the difference with your very first roll

The Gyro™ 1. The custom bowling glove that tailors itself to your hand.

Every bowler has a hand, a style, a delivery that is unique. That's why you need a glove that's as individual as you are. The Gyro 1. With two metal reinforcements for maximum support, and a unique design that adapts to the natural contours of your hand and wrist. You maintain a natural hand position without stress or discomfort, yet get the support you need to improve your release form and build confidence. Available in Black for right or left hand; small, medium or large. Model 500.

The Original™

Palm pad keeps ball away from palm, improves thumb release. You get more control and lift without topping. Available in Black or Silver for right or left hand; small, medium or large. Model 350A.

Pro Accessory Kit

Complete with the products you need and use most—all packed in an attractive Black case featuring Earl Anthony's signature. Model 495

NEW! X-tra Skin

The way to maintain a smooth, even release and protect against blisters. X-tra fast drying and X-tra durable. Includes 25 patches and fast-drying adhesive. Model 300.

NEW! Sof-Touch Shoulder Pad

One inch polyurethane-foam pad attaches to shoulder strap of bowling bag. Unique design lets you custom-fit pad for maximum comfort. Hook and loop closure. Fits single and double-ball bowling bags with shoulder straps. Model 465.

The world's largest maker of quality bowling balls.

The Force™

Combines metal wrist support with a palm pad to give you more lift and control for improved consistency. Soft, durable materials and convenient hook and loop fastener. Available in pecan color for right or left hand; small, medium or large. Model 700.

The Regal™

Metal wrist support locks hand and wrist in perfect release position. Hook and loop closure for quick, easy adjustment. Available in assorted colors for right or left hand; small, medium or large. Model 840.

Wrist Control®

Thumb support and padded wrist support assures "automatic" finger lift for more power and pin action. Durable reinforced backing. Hook and loop closure for exact adjustment. Available in assorted colors for right hand. One size fits all. Model 810.

NEW! Ultra-Grip Roll-on

Rolls on to glove or fingers to improve grip and release control. Strengthens grip without sticking. Unique "roll-on" design means no waste—lasts up to three times longer than powder or cremes! 12 bottles per display pack. Model 20.

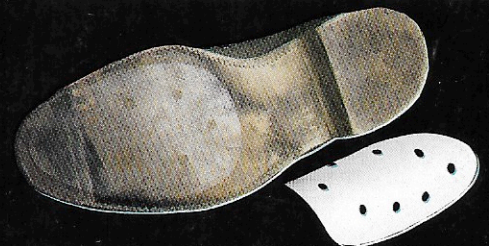

NEW! Plug Dams

Makes plugging drilled holes a breeze. Keeps plugging compound in place, prevents leaking. Four sizes included on each circular disk. Quick and easy to use—a must for pro shops!

Box of 140 circular Plug Dams Model 40

Box of 100 oval Plug Dams Model 42

NEW! Ultra-Glide Sole

Self-adhering sole assures a smooth, even slide every time. One size fits all. Model 268.

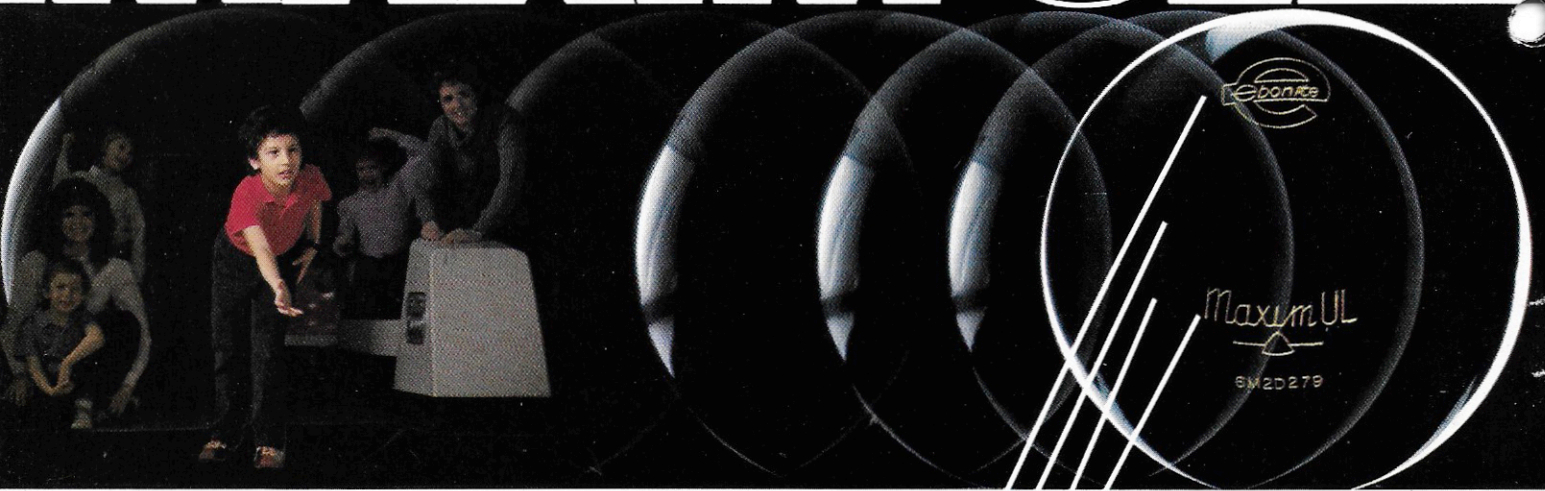

New! Ultra-Grip Tape

Ultra-Grip Tape inserts for thumb and fingers to increase gripping strength for more lift and a stronger roll. 30 inserts included per pack. Available in Black or White. Model 11/12.

MAXIM^{T.M.} UL

Teach 'em right!

Maxim UL for kids

This ball is perfect for teaching beginners to bowl. Maxim UL has a low top weight. That means the ball releases easy, rolls true and knocks down pins, even when rolled extra-slow. Children learn the fundamentals the *right way*, and have fun doing it.

And Maxim UL is made of durable polyurethane, so it will survive the occasional "approach kerplunks" kids are prone to give it.
In 6, 7, 8 lbs.

- **Low top weight** makes ball release easy, roll smooth. That's important for beginners.
- **Polyurethane construction** of shell and core makes Maxim UL extremely durable.
- **Light weight design, just right for kids.** It lets them concentrate on improving hand and wrist control.
- **The Ebonite name.** Assurance that your child is rolling a ball that's specifically designed for his or her needs.
