.....

Futuristic technology, computer aided engineering designs and amazing power have brought forth **OMEGA**, the most technologically advanced bowling ball ever. The new Cast Acryllium™ Cover (CAC) combined with Level 4 core™\*\* technology will take your game to the next level. Angular velocity is enhanced, and the Omega literally explodes into the pocket, pushing your game to its outer limits. Plus, the advances of CAC combined with the ball's patented\* core design not only

The Omega Dry is designed to dampen the hooking power of this veneer to accommodate dry lane conditions.

repel oil from the lane, but they also allow Omega to maintain its radius of gyration, regardless of drilling customization. The ultimate in-pocket tracking technology and the futuristic advances of the Omega deliver consistent, hard-hitting power. Nothing can surpass the power of Omega... Nothing.

■ Heavy Oil

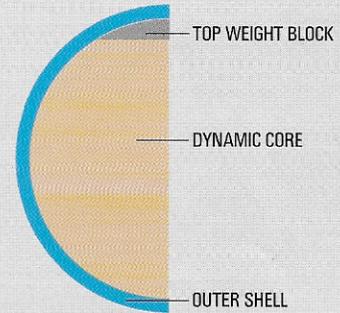

# NITRO

The **NITRO/R<sup>2</sup>** enhances the reaction in our Reactive Resin™ veneer. The internal integrity of the core is no longer static in design, and makes use of mass displacement and distribution to effect a positive spin bias through the core center line emphasizing total ball dynamics and continues to focus on optimum ball roll and reaction.

The **NITRO** two-piece balls have a specially-formulated urethane shell and a precisely placed Dynamic Core. The exclusive Dynamic Core gives the Nitro a precise area of concentrated weight so it skids longer, hooks later and harder.

\*11 pounds in the finished 14, 15 and 16 pound balls.

# TURBO/C

The **TURBO/XL** has been engineered to fit an incredibly wide range of bowlers on wet and dry lane conditions. The multi-piece core construction and sanded Reactive Resin™ shell slide longer, grip the lane tighter and deliver explosive force to the pocket.

The **TURBO/C** is the next step in Turbo technology. The millable ceramic type alloy core combined with a new polymeric blend of Reactive Resin™ shell delivers lane gripping action never before thought possible and devastating power to the pocket. The ultimate Turbo to date.

# TURBO

The **TURBO/X** with Reactive Resin™ has a modified Turbo core, dynamically balanced to increase its kinetic energy for greater hitting power, keeping pins low and explosive.

The **TURBO's** powerful two-piece construction gives you a highly concentrated core with an extra thick shell – nearly two inches of urethane. This means a more consistent roll and greater impact, keeping pins lower for improved carry-through.

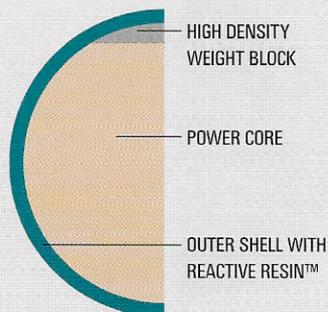

\*10.3 pounds in the finished  
14, 15 and 16 pound balls.
