

BOWL TO WIN

EBONITE 

XXXCEL

FACT: From high performance cores to superior coverstocks, Ebonite leads the bowling industry.

FOR 100 YEARS, THE EBONITE NAME HAS TAKEN THE GAME TO NEW HEIGHTS. THAT'S BECAUSE WE CONTINUE TO GROW WITH THE SPORT. WHEN BOWLERS SPEAK, WE LISTEN. WHEN NEW TECHNOLOGY COMES INTO PLAY, WE DESIGN TO IT. AND WHEN IT'S TIME TO BREAK NEW GROUND, OUR INNOVATIONS CREATE THE BAR FOR OTHERS TO RISE TO. FROM HIGH PERFORMANCE CORES AND SUPERIOR COVERSTOCKS TO QUALITY ACCESSORIES LEADING THE INDUSTRY, THE EBONITE NAME CONTINUES STRONG.

ALTHOUGH OUR FOCUS REMAINS ON THE FUTURE, THAT DOESN'T MEAN WE'VE FORGOTTEN THE PAST THOUGH. IN HONOR OF OUR 100TH YEAR ANNIVERSARY, WE PAY TRIBUTE TO THE HISTORY OF THE SPORT WITH THE CLASSIC SERIES FROM EBONITE. REFER TO PAGE 7 FOR A LOOK AT OUR CLASSIC SERIES AND THEN CHECK OUT THE REST OF OUR CATALOG FOR ALL THE EXCITING NEW OFFERINGS THIS SEASON.

XCEL Series

THE XCEL SERIES PRODUCT THAT WILL RE-DEFINE WHAT XCEL MEANS. ARMED WITH THE MODIFIED SCALIEN CORE WRAPPED AROUND AN INCREDIBLE PHAZED BOMBER REACTIVE VENEER, THIS SERIES WILL OUTPERFORM ALL OTHERS, IN HOOK AND INCREDIBLE HITTING POWER.

TORNADO WARNING

“With today’s high technology balls, proper ball care maintenance is more important than ever.”

—Jeff McCorvey of McCorvey’s Pro Shops

Restoring Factory Texture

FACTORY POLISHED BALLS

By Ball Spinner

Cross-sand in a 6-sided pattern with 800-grit wet sandpaper, then polish with Powerhouse™ Factory Finish.

By Ball Resurfacer

Use yellow diamond pads, then polish in spinner with Powerhouse™ Factory Finish.

FACTORY SANDED BALLS

By Ball Spinner

Sand in a 2-sided pattern with 600-grit wet sandpaper, then sand in a 6-sided pattern with 1000-grit Abralon™ pads.

By Ball Resurfacer

Sand with yellow diamond pads, then sand with 1000-grit Abralon™ pads for 3 minutes.

SURFACE TEXTURE & MAINTENANCE

Correct surface texture enables your Ebonite ball to perform at its peak. Changing the surface texture is much more effective than a drilling layout at manipulating the overall hook potential of a ball.

Ebonite factory polish is designed for light to medium oil conditions and medium speed players. If after testing the box finish at your bowling center, you decide your ball speed should be faster, or the lane condition heavily oiled (causing the breakpoint to be too far down the lane to provide adequate hook), we suggest dulling the ball with Powerhouse™ Matte Finish or Sandblaster, or scuff with a 3M burgundy scuff pad, 500-grit, or 1000-grit Abralon™ pads.

Factory sanded balls are designed for heavier oil patterns and faster ball speeds. If your ball speed is slower or the oil pattern more hooking, reduce the surface friction. To polish, you can develop a medium luster with 2000-grit Abralon™ sanding pads.

Higher luster can be attained through 4000-grit Abralon™ pads, or by polishing with Factory Finish Polish. For maximum length, polish first with a 4000-grit Abralon™ pad; then polish with Extender Polish.

It is important to maintain the surface texture of sanded bowling balls. We recommend renewing the surface texture every 15-20 games by scuffing with appropriate grit sanding media—Abralon™ pads, Powerhouse™ Matte Finish or Sandblaster, scuff pads or sandpaper either by hand, or ball spinner. Consult the surface friction guide at www.ebonite.com for more information.

Restoring Factory Texture

MINIMAL LENGTH SURFACE TEXTURE STEPS

- 360-grit Abralon™ pad
- Powerhouse™ Sandblaster Polish
- 500-grit Abralon™ pad or 3M burgundy scuff pad
- 3M gray scuff pad
- 800-grit wet sandpaper
- 1000-grit Abralon™ pad or Powerhouse™ Matte Finish Polish
- 500-grit Abralon™ pad, followed by 2000-grit Abralon™ pad
- 1000-grit Abralon™ pad, followed by 2000-grit Abralon™ pad
- 1000-grit Abralon™ pad, followed by Powerhouse™ Factory Finish Polish
- 1000-grit Abralon™ pad, then 2000-grit, then 4000-grit Abralon™ pads

MAXIMUM LENGTH SURFACE TEXTURE STEPS

- 1000-grit Abralon™ pad, then 2000-grit, then 4000-grit Abralon™ pads, followed by Powerhouse™ Extender Polish

It is imperative to maintain a clean surface for the oil-displacing pores in the ball's surface to function properly. Powerhouse™ Energizer Cleaner and Powerhouse™ Ball Scrubs contain a potent combination of organic and inorganic cleaners to deep clean dirt and oil from the ball's pore structure. Both products are legal for use during ABC competition and after the conclusion of competition. The micro-fiber Powerhouse™ Oil-Free Towel provides more absorption of oil and dirt than standard terry towels.
