

Brunswick Information Sheet

Sting Zone – Black Pearl / Red Pearl

Specifications

Part Number

60-104818-93X

Covertstock

PowerKoil 17 Reactive

Color: Black Pearl / Red Pearl

Hardness: 75 - 77

Factory Finish

High Gloss Polish

Core Dynamics

RG Max: 2.703"

RG Min: 2.684"

RG Diff: 0.019"

RG Avg: 8.3

Available Weights

10-15 Pounds

Reaction Characteristics

Ready to start hooking the ball? Move up from Plastic and Urethane to Reactive Urethane covertstock technology. Compared to Plastic, Reactive Urethane covertstock technology increases traction and hooking action in the oil, and Reactive covertstocks can be sanded or shined to create large differences in hook potential.

The Sting Zone Reactive covertstock outperforms and out hooks polyester and conventional urethane and is best suited for dry to medium oil lane conditions.

Notes on Drilling

Note: The top dead center of the puddle weight block is marked by a pin visible on the surface of the ball. Sting Zone 10-15 pound balls can be drilled using the techniques developed for two-piece balls.
