DRILL A HOLE WITH A VACUUM? PRECISELY.

Only a powerful vacuum like the one created by AMF/Century's Vacu-Jig™ can hold a ball steady enough to eliminate shifting and vibration during the ball drilling process. The Vacu-Jig is available as basic package, with your choice of optional equipment, or as the complete **Vacu-Jig Performance System**. Call **1-800-525-8135** (or 303-424-7800 for international calls) today for a free demonstration video.

The complete **Vacu-Jig Performance System** includes:

- Your choice of 24" or 27" fully-integrated cabinet stand
- 38 heavy-duty carbide-tipped drill bits and plug cutter
- Large, digital Proscale pitch readout system
- Deluxe, extra quiet, dual filtration shop vacuum
- Flex-Shaft Variable Speed Grinder with foot pedal
- Digital and dial calipers for ultra-precise measurements

Every **Vacu-Jig** comes fully assembled and includes:

- Heavy-duty mill/drill
- Patented vacuum ball cup (uses no jiggle-prone rubber seals or clamps)
- Built-in aluminum bit holder
- Flush-mounted vacuum pressure gauge and valve
- Complete user's manual & instructional video
- Safety plate (for out-of-specification balls)
