

The 1995 Brunswick Ball Collection
Brunswick® Balls.
*Still On
A Roll.*

Get into the Zone with unbeatable high performance. Zone features a maximum density Zone Nucleus, a Dual Tour Shape Core System and our Repellent Reactive™ Cover Stock, to create a ball less sensitive to changing lane conditions while retaining the hook potential and back-end reaction of highly reactive balls.

URETHANE

BLACK AMBER ZONE™

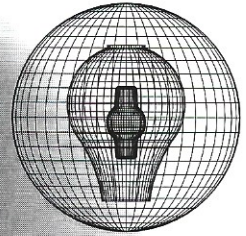

10-16 lb.

60-101822

The inverted light bulb shape surrounds the Extra High Density (EHD) Zone Nucleus, delivering a smooth, even hooking action in the heads and at the breakpoint.

BLACK AMBER ZONE
Hook Potential: 14-7 (dull/shiny)*

Leave no pin standing. Leave no Zone unturned.

RED ZONE

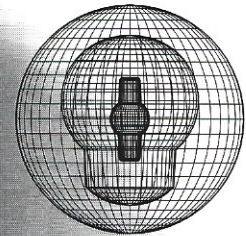

10-16 lb.

60-101826

The Red Zone uses a more aggressive inverted light bulb shaped outer core and the EHD Zone Nucleus featuring the densest material ever developed for a ball core. Out of the box, it produces an early and even hooking action. When finished and laid out the same, the Red Zone has more skid/snap character than the Black Amber.

RED ZONE
Hook Potential: 14-7 (dull/shiny)*

RED & BLACK AMBER ZONE CONSTRUCTION:

16 LB.

3-component design with 2-part, compound core

15 LB.

4-component design with 3-part, multi-density core

12-14 LB.

4-component design with 3-part, compound core

"...both Zones had an excellent reaction. The Red Zone let me get deep on the lane, swing it out late and create a large angle back to the pocket. With the Black Amber Zone, I played the center of the lane and the ball reacted evenly down the lane. This let me create a deep fallback-type shot, without covering a lot of boards left to right. These balls are great." Amleto Monacelli, Brunswick Pro Staff

URETHANE

Thunder Rolls

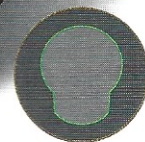

Rhino™ Pro. Still Charging. Still Champion.

RHINO PRO GOLD

11-16 lb.

60-101536

What's the golden rule: The Gold Rhino Pro rules. Its pearlized reactive urethane cover and two-piece construction also features a medium-size inverted light bulb core, to dominate on medium to oily lanes.

RHINO PRO GOLD
Hook Potential: 14.5-7 (dull/shiny)*

RHINO PRO TEAL
Hook Potential: 14-7 (dull/shiny)*

RHINO PRO TEAL

11-16 lb.

60-101285

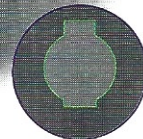

The Teal is a terror on oily lanes with tight backends. Its two-piece design, unique core shape and reactive urethane cover even delivers a stronger hooking action than the Purple Pro.

RHINO PRO PURPLE

11-16 lb.

60-101155

Bowling's first highly reactive overlord of the lanes. The Purple's two-piece urethane construction means dramatic back-end reaction on moderate oil.

RHINO PRO PURPLE
Hook Potential: 11.5-6.5 (dull/shiny)*

URETHANE

*Rhino RE pounds the pins,
not your pocketbook.*

DESERT SKY RHINO RE

11-16 lb.

60-101542

REactive. REvolutionary. This Rhino's exclusive reactive urethane cover features a two-piece design, to go longer and hook harder.

DESERT SKY RHINO RE
Hook Potential: 13-6
(dull/shiny)*

EMERALD RHINO RE

11-16 lb.

60-101854

REnewed power, with an all-new RE configuration. Our pearlized Emerald cover stock keeps you looking good while going long.

EMERALD RHINO RE
Hook Potential: 13-6
(dull/shiny)*

BLACK RHINO

11-16 lb.

60-100733

*The first 100% urethane built to last.
The Black Rhino still rules on medium
to dry lanes.*

BLACK RHINO
Hook Potential: 10-5
(dull/shiny)*

STORM THE LANES WITH RHINO!

*Hook Potential is rated on a scale of 1 to 20 (1=low hook potential, 20=high hook potential), and describes the potential a ball has to hook. Bowling balls do not hook by themselves. Bowling balls hook in response to the forces a bowler applies at release (speed, direction and rate of rotation) and lane conditions. Hook potential ratings are given as a range that represents the maximum and minimum hook potential of the ball. Note: Hook Potential ranges are for dull and shiny balls (dull=320 grit, shiny=high gloss).

For over 150 years, Brunswick has delivered the best bowling has to offer. Celebrate year after year of excellence with our high performance Mineralite™ Anniversary Ball.

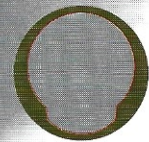

IT'S OUR ANNIVERSARY!

We manufactured the first Mineralite in 1906, but it was nothing like this number: Now it's highly reactive urethane with a highly polished cover stock. Featuring two-component design and one-piece core in 15 and 16 lbs. Three-component with two-piece, multi-density core in 12-14 lbs. And two-component with one-piece, spherical offset core in 10 and 11 lbs.

150TH ANNIVERSARY MINERALITE

10-16 lb.
60-101743

MINERALITE CORE
Hook Potential: 13-6 (dull/shiny)*

X-TREME™ TEAL REACTIVE

10, 12, 14, 15, 16 lb.
60-101546

File under X, for X-tremely reactive. A three-piece ball with an all-new, highly reactive urethane cover stock, for stronger back-ends and a higher hook potential than the Black Rhino.

Hook Potential: 12-6 (dull/shiny)*

X-TREME PACIFIC BLUE REACTIVE

10, 12, 14, 15, 16 lb.
60-101851

X-tremely new, with an x-tremely reactive cover. The Pacific Blue bomber delivers incredible hook and strong back-end reaction.

Hook Potential: 12-6 (dull/shiny)*

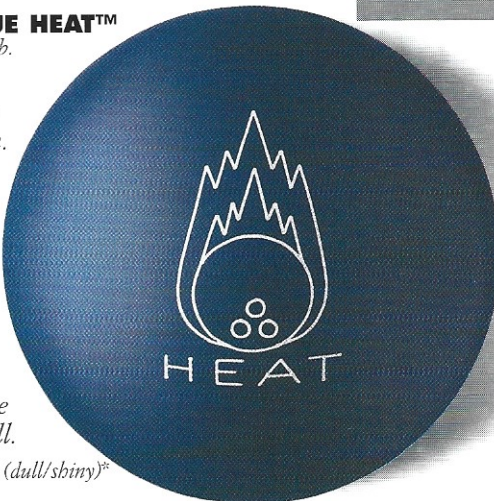

URETHANE

SANDED BLUE HEAT™

10, 12, 14, 15, 16 lb.
60-101545

The Heat is on the competition. A 100% urethane cover stock, highly resilient core and concentrated puddle-weight block give you less deflection, more power, truer roll.

Hook Potential: 9-4 (dull/shiny)*

BRILLIANT RED HEAT

10, 12, 14, 15, 16 lb.
60-101852

More Heat. More fire power. And more consistent rolling action.

Hook Potential: 9-4 (dull/shiny)*

PLASTIC

Lightning Strikes

These balls are sure to strike more than once.

RHINO MAIZE PLASTIC
10, 11, 12, 14, 15, 16 lb.
60-101875

Now everyone in the family can afford to roll a Rhino, in one of our five fantastic color configurations. The original is back, better than ever.

RHINO TURQUOISE PLASTIC
10, 11, 12, 14, 15, 16 lb.
60-101713

RHINO PLUM PLASTIC
10, 11, 12, 14, 15, 16 lb.
60-101714

RHINO BURGUNDY PLASTIC
6, 8, 10, 12, 13, 14, 15, 16 lb.
60-101715

RHINO RED PLASTIC
6, 8, 10, 12, 14, 15, 16 lb.
60-101853

THE POWER OF RHINO. THE PRICE OF PLASTIC.
