CAN ONLY HAPPEN BY STAYING IN BALANCE."**

— BRAD ANGELO —

PP[™]

Pro performance

MACE CORE

Mechanical Asymmetric Core Engineering. Designed as a two-component elliptical core system - dynamically the strongest asymmetric core ever produced for a Brunswick reactive ball.

PRO TIP

"It has arrived, a ball that allows you to control any part of the lane and attacks the pins with more force than you can handle."

Sean Rash

SIEGE™

Siege introduces Propel coverstock, an evolutionary coverstock designed to improve mid-lane and backend traction on today's slicker surfaces. Propel coverstock combined with the new MACE core delivers both length and strength. The strong traction in the oil keeps the Siege on target. The aggressive hook on the backend increases pin action and delivers awesome hitting power. Take the Siege to battle on difficult oil conditions and raise your game. Siege the day!

60-105214

HP[®]

High performance

WILD THING™ — NEW

The Wild Thing and its new ultra-low RG Paragon core improves the adhesion of the ConneXion™ coverstock to the lane, accelerating the response to friction and unleashing its attack on the pins. This core/coverstock combination allows the Wild Thing to generate a shape never seen before in the Brunswick line.

60-105212

PARAGON CORE

The new ultra-low RG Paragon core was designed with two intentions. First, to lower the RG to create a faster revving core that will provide improved mid-lane traction. Second, to raise the RG differential to increase the track flare potential, which will generate more overall hook with standard layouts and the use of interchangeable thumb sleeves.

PRO TIP

"When oil carries down lane, this ball picks up, continues and goes through the pins in a meaningful way. This ball needs to be in your arsenal!"

Darber Bohm III

HIGH PERFORMANCE	COVERSTOCK	FACTORY FINISH	HOOK POTENTIAL	LENGTH	SHAPE	RG-MAX	RG-MIN	RG-DIFF	RG-AVG	WEIGHTS
Wild Thing	ConneXion	4,000 Micro Pad	160	110	95	2.514	2.469	0.015	2.6	12-16
Wild Ride	ConneXion	Rough Buff	145	120*	90	2.548	2.512	0.036	3.8	12-16
MaXXX Zone	PlaZma Solid	600-Grit Wet Sand	175	45	70	2.522	2.480	0.042	3.0	12-16

WILD RIDE™

The Wild Ride delivers the proven medium RG Torsion™ asymmetric core at the High Performance price point. This core/coverstock combination allows the Wild Ride to skid easily through the front part of the lane, dig in aggressively at the end of the mid-lane, then stick strong to the backend- providing powerful traction off the break point. The ConneXion coverstock, united with the familiar Torsion asymmetric core, provides a ride that is untamed.

60-104978

TORSION ASYMMETRICAL CORE

The Wild Ride migrates the proven medium RG Torsion asymmetric core into the High Performance price point.

PRO TIP

"The Wild Ride is clean through the fronts, allowing the ball to store energy and make a strong but smooth move on the backends. It allows me to move in and open up the lane."

Diandra Abbaty

MAXXX ZONE®

The MaXXX Zone core uses the same inner core shape as the Smash Zone®, however the weight distribution between the inner core and the outer core has been adjusted to raise the overall RG. This means even with its aggressive PlaZma™ coverstock, the MaXXX Zone will clear the fronts and provide maximum traction in the mid and the backends, even on the tightest lane conditions.

60-104963

MAXXX ZONE CORE

The MaXXX Zone uses an updated version of the original Inferno® core.

PRO TIP

"Regardless of how oily the lanes are, this ball is best used for going up the lane. A great ball for controlling the pocket."

Parker Bohn III

-  Wild Thing
-  Wild Ride
-  MaXXX Zone

AVP

Advanced performance

**"THROUGH THE APPROACH, YOUR HEAD SHOULD
REMAIN STEADY AND YOUR EYES SHOULD
FOCUS ON A TARGET."**

— SEAN RASH —

AVP[™]

Advanced performance

PYTHON[™] — NEW

Predictable power resonates from the Python. With a more direct line of attack on the lane, a fast revving core and constricting power on the pins – the Python provides a secure ball reaction at the Advanced Performance price point. For the bowler who wants to play straighter angles with power you can count on, let the Python take control.

60-105210

LOW RG CORE

The Python uses the same inner core shape as the MaXXX Zone[®]

PRO TIP

"This is the first ball out of my bag. Everyone needs a benchmark ball. I can tell what part of the lane I'm going to play by throwing it three or four times."

Sean Rash

ADVANCED PERFORMANCE	COVERSTOCK	FACTORY FINISH	HOOK POTENTIAL	LENGTH	SHAPE	RG-MAX	RG-MIN	RG-DIFF	RG-AVG	WEIGHTS
Python	EnMotion [™]	High Gloss Polish	115	100	70	2.522	2.480	0.042	3.0	10-16
Rattler	Activator [®]	High Gloss Polish	125	110	85	2.539	2.496	0.043	3.5	10-16
Copperhead	PowerKoil 18 Solid	800 Grit Wet Sand	130	80	60	2.539	2.496	0.043	3.5	10-16

RATTLER™

The Rattler uses the multi-sided Rocket™ core system by Brunswick, providing a low RG core that, when combined with the original Activator® coverstock, produces a ball reaction that is unmatched at the Advanced Performance price point. Clean through the front with an aggressive move at the breakpoint, the Rattler gives amazing bang for the buck. There isn't another ball in this class that's even close.

60-104976

COPPERHEAD™

The Copperhead uses the multi-sided Rocket™ core system in combination with the proven PowrKoil 18™ coverstock to provide a low RG ball that revs up strong and creates tremendous mid-lane recovery. The 800-grit sanded finish on the Copperhead creates excellent traction in the oil and delivers a strong and continuous breakpoint. The Copperhead will bite through the oil and strike the pins.

60-104912

MULTI-SIDED ROCKET CORE

A low RG core combined with the original Activator coverstock. This core design produces a reaction that is unmatched at the Advanced Performance price point.

PRO TIP

"This is the ball I use when I need to clear the front part of the lane, the heads, and need more of an aggressive backend reaction."

Carolyn Dorin-Ballard

MULTI-SIDED ROCKET CORE

A low RG core combined with the proven PowrKoil 18 coverstock. This core design enables the ball to rev up strong and create tremendous mid-lane recovery.

PRO TIP

"The ball I go to when I'm looking for an even reaction all the way down the lane. The hook is gradual and continuous."

Johnny DeRaglia

Typical 38' medium-oily lane condition

-  Python
-  Rattler
-  Copperhead

AVALANCHE™ BLACK/ELECTRIC GREEN — NEW

Retro cores and strong reactive coverstocks define the new Avalanche series from Brunswick. Using proven core technology from the Teal Rhino Pro and some of the most well-known Brunswick coverstocks, the Avalanche delivers unprecedented value to the bowling customer.

60-105225

LIGHT BULB CORE

All Avalanche balls use the acclaimed Teal Rhino Pro Light Bulb core. This core and its Danger Zone modification were at the heart of two of the most successful balls of all time.

PRO TIP

"Whether the lanes are hooking early or you're on a drier lane condition, this is a perfect ball. It finishes very well without overreacting on the backend."

Johnny Petraglia.

AFFORDABLE PERFORMANCE	COVERSTOCK	FACTORY FINISH	HOOK POTENTIAL	LENGTH	SHAPE	RG-MAX	RG-MIN	RG-DIFF	RG-AVG	WEIGHTS
Avalanche BLK/EGRN	PowrKoil 18 Pearl	High Gloss Polish	85	140	75	2.548	2.524	0.024	4.2	10-16
Avalanche Slide	PowrKoil XD	High Gloss Polish	75	155	80	2.548	2.524	0.024	4.2	10-16
Avalanche Solid	PowrKoil 18 Solid	Rough Buff	95	125	70	2.548	2.524	0.024	4.2	10-16

AVALANCHE SLIDE™

The Avalanche Slide uses the brand-new PowrKoil XD™ Reactive coverstock, which has been specifically designed to provide extra distance (XD) through the heads in comparison with the traditional PowrKoil coverstocks. Combined with the Light Bulb core, the PowrKoil XD coverstock gets cleanly through the heads, even on broken-down lane conditions, while maintaining the strong backend reaction necessary to bury the pins in the pit.

60-104965

PRO TIP

"For those of you who were watching when I finally won my first PBA title, you saw that I used the Avalanche Slide during games 1 and 2 on the TV show. I used the Slide as a medium-friction factor ball with a medium to quick response time."

Brad Angelo

AVALANCHE SOLID™

The Avalanche Solid-Blue/Red uses PowrKoil 18™ Solid coverstock, the most successful reactive formulation in the bowling industry, to traction more in the oil and create a higher hook potential ball than the Avalanche Pearl-Blue/Silver.

60-104771

PRO TIP

"When the oil volumes are low and I need a smooth reaction, I make sure to use my Avalanche Solid."

Sean Rash

Typical 38' dry to medium-oily lane condition

-  Avalanche BLK/EGRN
-  Avalanche Slide
-  Avalanche Solid

ELP

POWER GROOVE[®] REACTIVE

Reactive coverstocks respond more aggressively to dry lane surfaces, increasing backend hooking action and hitting power. All Power Groove reactive balls feature PowrKoil 17[™], the strongest reactive coverstock ever used on a Groove-class ball, and Brunswick DISC[™] (Differential Increasing Side Cylinders) core technology.

DISC CORE

Differential Increasing Side Cylinders.

The precise geometric placement of high density side cylinders maximizes the increase in RG differential while maintaining symmetry for easy drilling.

PRO TIP

"A nice ball to have when you need to get down the lane but still have some pop at the end."

Diandra Asbaty
