

Information Sheet

Brunswick 

Black/Red Reactive Monster

MONSTER

It's in You.

Specifications

Coverstock

PowrKoil 17 - Reactive
Color: Red/Black
Hardness: 77-79

Surface Finish

Rubbing and Finishing Compound
Double Buff

Core Dynamics

RG Max: 2.579
RG Min: 2.544
RG Diff.: 0.035
Average RG: 4.7

Performance

Hook Potential: 75
Length: 140
Typical Breakpoint Shape: 75

Available Weights

10-16 Pounds

Reaction Characteristics

The Black/Red Reactive Monster extends the range of Reactive reactions in the mid-price category by adding a medium flare alternative to the Green/Black Reactive Monster.

For the Black/Red Reactive Monster, the original Monster core has been modified to create a lower differential and track flare potential than the Green/Black Reactive Monster. This change results in more length and a smoother backend reaction; making the Red/Black Monster a better match for stronger release players and/or drier lane conditions.

Brunswick's Monster-Series delivers the bowling industries widest range of ProActive and Reactive ball reactions available at the mid-price point.

Drilling Information

The Black/Red Reactive Monster features a symmetric core design with a medium-low differential RG that can be drilled using standard drilling techniques for two-piece balls. For more detailed drilling information see Brunswick's "Drilling Instructions for Low-Differential Symmetric Core Bowling Balls" included with this information sheet.
