PERFORMANCE SO WICKED, YOUR COMPETITION WILL BE SCARED STRIKELESS.

Unleash the most violent hook this side of high-end, high-performance balls. Monster. Other particle offerings at this price level are only slightly different than their reactive counterparts. And unless you're a top-of-the-line, high-performance bowler, the difference will be close to zero. But Monster gives you an edge — especially on oily lane conditions. Monster will significantly out-hook and roll more evenly than anything at this price level. Anything. The difference is ... monstrous. Thanks to Brunswick's exclusive Trizact™-finished Proactive® coverstock.

It took the million-dollar Throbot™ (the world's only computerized mechanical release simulator) and the superCATS Tracking System (the world's only 24-sensor CATS tracking lane) to develop Proactive technology. Which is why only Brunswick can offer true Proactive coverstocks. Other me-too particle coverstocks are available, but only Proactive delivers Brunswick's monster performance. And only Monster does it so affordably. So go ahead, wreak havoc. Deal out destruction. Throw a Monster game. And eat 'em up.
