

Information Sheet

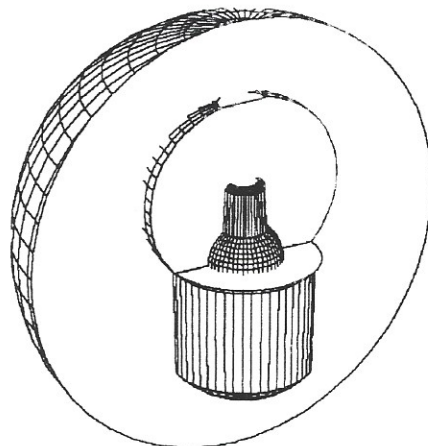

Parker Bohn III MVP™

Part Number

60-102940

Specifications

PowrKoil17™ Reactive Coverstock
Polished finish
Hook Potential: 18.5 - 10.5 (dull/shiny)
Typical Length: 3
Typical Backend: 10
RG Max: 2.563
RG Min: 2.516
Average RG: 4
RG Differential: 0.047
Track Flare: 9.2

Reaction Characteristics

Brunswick is proud to introduce to you the new Brunswick MVP™ Series of bowling balls. The MVP Series features the names of top PBA tour champions, like Johnny Petraglia, Walter Ray Williams, JR., Mike Aulby and Parker Bohn III. Each ball has been individually designed by the most exacting science in bowling to fit each bowler's particular style. Each player has taken an element of Brunswick technology, blended it with his years of pro tour experience, and created a ball that meets his own demanding standards.

Parker Bohn III likes to throw the ball firm and up the lane. The Parker Bohn III MVP ball features a heavy rolling core design and PowerKoil17 cover that gives a more even change in direction off the dry boards, similar to the Sapphire Zone, one of Parker's all-time favorite Brunswick balls and a favorite among the general public.

Drilling Information

All weights of the Parker Bohn III MVP ball can be drilled using techniques developed for two-piece balls. See Brunswick's "Seven Popular Layouts" for detailed drilling instructions.
