

Condensity Technology

A process that compresses a reactive urethane formulation for an unsurpassed coefficient of restitution. Or, simply said, pin carry with the momentum of a runaway train.

Dynamic Integrity

This patented Quantum concept gives lightweight balls the same reaction potential as heavier ones. Developed by Brunswick Technology Ventures (BTV).

Flow-Thru Core*

This patent-pending process virtually eliminates core separation, allowing the Quantum line to deliver hook characteristics for a wide range of bowling styles and lane conditions.

Authorized Quantum Dealers

Only the most exceptional dealers can measure up to BTV's strict set of standards.

The Coming of Sage

Uniting the best of all ball characteristics.

The Sage Quantum® The most reactive cover stock to date. The most explosive core design yet. And the most hook ever. Period. Sage Quantum brings "The Best of..." ball qualities to a single sphere — challenging the outer limits of hook potential and taking backend reaction *literally* off the chart.

12-16 lbs. • Hook Potential 19-11 (Dull / Shiny) • Length 1-2 • Backend 10.5

Sage Tour Quantum New reactive urethane formulation gives this special Tour edition a longer roll and an even later-breaking hook. Also, backend hits a new high.

12-16 lbs. • Hook Potential 18.5-9.5 (Dull / Shiny) • Length 4-5 • Backend 11

*Available in all 2-piece Quantum. Consult your Authorized Quantum Dealer for specifics.

Fire Quantum

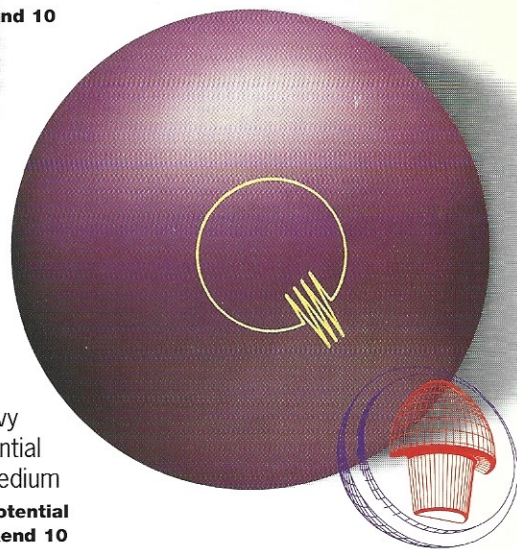

For pure Fire power, this one starts out clean through the front, stronger on the back, with powerful hook and unstoppable momentum. **12-16 lbs.**

• **Hook Potential 17-9 (Dull / Shiny)** • **Length 4.5** • **Backend 10+**

Violet Hook Quantum Extreme hooking action, early roll, and strong backend reaction allow Violet Hook to change direction and hook when other balls continue to skid. Best on heavy oil.

12-16 lbs. • **Hook Potential 17-9 (Dull / Shiny)** • **Length 1.5** • **Backend 10**

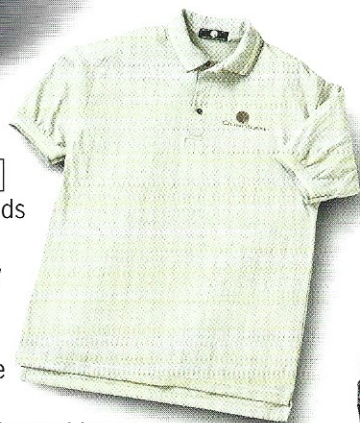

Forest Green Quantum

Expect a sudden, powerful backend reaction with center-heavy action and a high track flare potential for consistent performance on medium and oily lanes. **12-16 lbs.** • **Hook Potential 15-8 (Dull / Shiny)** • **Length 4** • **Backend 10**

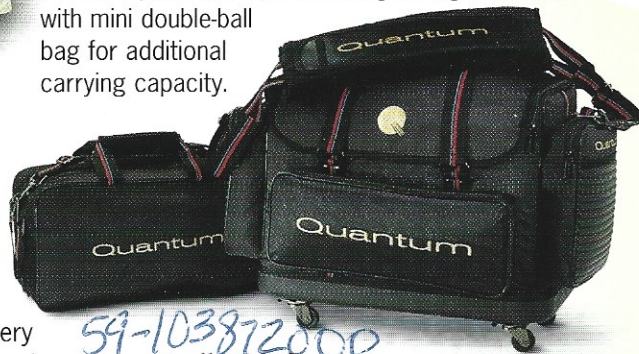

Quantum Pinstripe Polo

The Quantum name on apparel commands the same status it gives to sports equipment. 100% combed cotton jersey couldn't be more comfortable. Striped-effect pattern couldn't be more stylish. Full cut provides plenty of room to move comfortably; dropped tail maintains a pulled-together look. Placket front with 3 metal buttons.

Quantum Roller Bag Deluxe tricot nylon delivers light weight and maximum protection. Removable feet and interchangeable wheels offer flexibility and convenience. Forged from durable metal hardware. PVC backing adds strength. Large front accessory pocket, two end pockets with rubber overlays, oversized zippers, suppersoft shoulder pad and embroidered gold logo. Comes with mini double-ball bag for additional carrying capacity.

Make the Leap to Quantum There's a Quantum to maximize every set of variables and lane conditions. Use this Ball Reaction Guide to determine your most effective Quantum. *59-103872000*

The Quantum Range	Sage	Sage Tour	Fire	Violet Hook	Forest Green
• Cover Stock:	Highly reactive	Highly reactive	Highly reactive	Highly reactive	Highly reactive
• Cover Stock Preparation:	Polished	Polished	Polished	320 grit	320 grit
Ball Reaction					
• Hook Potential (dull / shiny) (1-20):	19-11	18.5-9.5	17-9	17-9	15-7
• Typical Length (1-10):	1-2	4-5	4.5	1.5	4
• Typical Backend Reaction (1-10):	10.5	11	10+	10	10
Core Dynamics					
• Center Heavy / Cover Heavy (1-10):	1.7	2.8	3.2	1.7	3.5
• Track Flare Potential (1-10):	10	8.9	7.6	10	6.5
• Comment:	Breaks early with the highest hook potential available.	Breaks later, hooks harder.	More length than Forest Green.	Early change of direction, maximum hooking action.	Medium length, strong backend.
