CUDA™/C & CUDA™/C PEARLIZED

Columbia 300 is adding a finer point to the game - Barracuda! The new Cuda™/C combines the concentrated centrifugal hitting power of the unique CERAMICORE™ with the reactive lane performance of 2-inch thick FLEXCEL™ G2 urethane by BASF. This proven FLEXCEL™ G2 enhancement booms on the backend.

• CHARACTERISTICS: UP TO 2.5 INCH THICK FLEXCEL™ G2 REACTIVE URETHANE BY BASF ENHANCES A BOOM ON THE BACKEND. THE HIGH DIFFERENTIAL Rg BULB-SHAPED INTERNAL ASSEMBLY HOLDS THE CERAMICORE™ SATELLITE, COMBINED WITH A HIGH DENSITY FLIP BLOCK MAKING CUDA™/C THE STRONGEST FLIPPING, HIGHEST FLARE POTENTIAL BALL ON THE MARKET.

LT OIL MED OIL HVY OIL

PIRANHA™/C & PIRANHA™/C PEARLIZED JADE

Piranha™/C and Piranha™/C Pearlized Jade have changed the game. 100% Flexcel™ G2 reactive urethane combined with the exclusive parabolic shaped core surrounding the dense Ceramicore™ generates an explosive release of energy. Piranha™/C and Piranha™/C Pearlized Jade are both heavy rolling balls with high flare potential and excellent energy retention, producing more striking power.

• CHARACTERISTICS: UP TO 2.0 INCH THICK FLEXCEL™ G2 REACTIVE URETHANE BY BASF. BOTH BALLS ARE HEAVY ROLLING WITH EXCLUSIVE PARABOLIC-SHAPED CORES SURROUNDING THE DENSE, OFFSET, ROLL-AXIS ROTATING CERAMICORE™ WHICH TRANSFERS MORE HITTING POWER TO THE HEAVIEST PART OF THE PINS.

LT OIL MED OIL HVY OIL

STINGRAY™/C

The Stingray™/C redefines high performance in a non-reactive 2-piece urethane ball. Stingray™/C holds the exclusive CERAMICORE™ inside an internal core assembly with a high density flip block which enables this ball to outhook and outflare any other non-reactive ball.

• CHARACTERISTICS: THE HIGH DIFFERENTIAL Rg BULB-SHAPED INTERNAL ASSEMBLY HAS A MAXIMUM DENSITY CERAMICORE™ SATELLITE. STINGRAY™/C IS THE FIRST ENHANCED NON-REACTIVE URETHANE BALL TO UTILIZE CERAMICORE™ TECHNOLOGY. STINGRAY™/C OUTHOOKS AND OUTFLARES ANY NON-REACTIVE URETHANE BALL ON THE MARKET TODAY.

LT OIL MED OIL HVY OIL

BLUE BEAST®

The best buy in a high performance, non-reactive 2-piece urethane ball. The Blue Beast® overcomes dry heads and wet/dry conditions when the reactive Beast® is too aggressive. Modestly priced, the Blue Beast® surface can be easily polished to reduce hook.

• CHARACTERISTICS: UP TO 2.5" THICK HIGH FRICTION, NON-REACTIVE URETHANE. DESIGNED FOR MEDIUM OIL LANE CONDITIONS.

LT OIL MED OIL HVY OIL

BEAST®

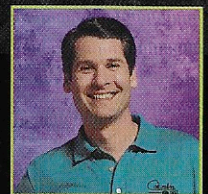

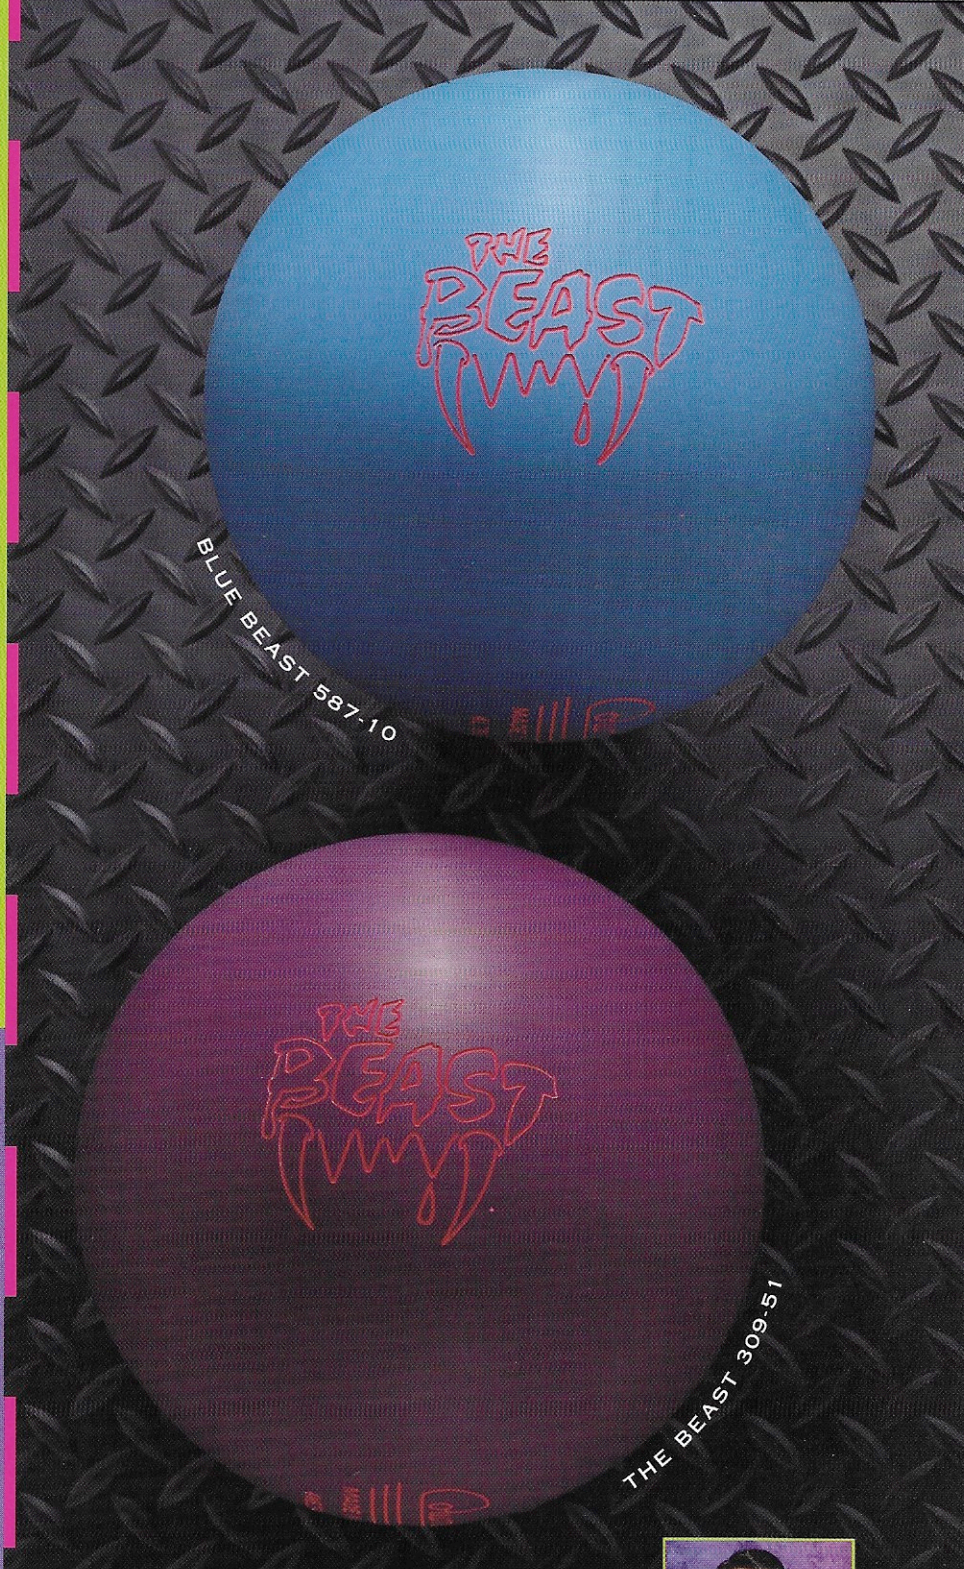

The Beast®, new and improved for 1995/96 with 100% FLEXCEL™ reactive urethane by BASF, has more powerful bite in medium to heavy oil while providing more dynamic striking power. With its affordable price, the Beast® will be easy on your wallet.

• CHARACTERISTICS: UP TO 2.5" THICK 100% FLEXCEL™ REACTIVE URETHANE BY BASF. HOOKS ON MEDIUM TO HEAVY OIL WHEN SANDED. HEAVY ROLL GOOD FOR MAXIMUM HEAD OIL AND BACKEND OIL BUILD-UP. CAN BE POLISHED FOR BACKEND REACTIVE FLIP.

YELLOW DOT LEGEND®

The Yellow Dot Legend® represents the Columbia 300 commitment to research and high technology. With longer skid on the smoothness of synthetic surfaces, as well as excellent performance on drier short oil, the Yellow Dot Legend® is the best performing polyester ball on the market.

- CHARACTERISTICS: 5/8" THICK SOFT POLYESTER DESIGNED FOR MEDIUM OIL. PERFORMS EQUALLY WELL ON BOTH SYNTHETIC AND WOOD LANES.

LT OIL MED OIL HVY OIL

BLACK KNIGHT®

The Columbia 300 Black Knight® is a moderately priced, highly polished, black, polyester ball that delivers top performance and control on medium to dry lane conditions. For the bowler who wants value plus that famous Columbia 300 core configuration combined with the unique characteristics of a highly polished, traditional black outer shell, the Black Knight® is your ball.

- CHARACTERISTICS: 5/8" THICK MEDIUM HARD POLYESTER COVERSTOCK DESIGNED FOR DRY TO MEDIUM DRY LANE CONDITIONS.

LT OIL MED OIL HVY OIL

BLUE DOT®

Columbia 300's Blue Dot® holds the lane and tracks true every time on bone dry lanes. Slamming through the pins with the punishing power of its high-tensile polyester cover, the Blue Dot® will do great things for your game. Only from Columbia 300.

- CHARACTERISTICS: 5/8" THICK HARD POLYESTER COVERSTOCK. DESIGNED FOR EXTREMELY DRY LANE CONDITIONS.

LT OIL MED OIL HVY OIL

BLACK SHADOW™

A great value, the Black Shadow™ only from Columbia 300, retains the legacy of the Black U-Dot® and has the original Black U-Dot® urethane formula coverstock. Designed to give you more hook and backend snap on heavy oil, the Black Shadow™ will become a vital weapon in any serious bowler's arsenal.

- CHARACTERISTICS: 5/8" THICK ORIGINAL BLACK U-DOT® HIGH FRICTION NON-REACTIVE URETHANE FORMULA. LIKE THE BLACK U-DOT® THIS BALL HOOKS ON MEDIUM TO HEAVY OIL WHEN SANDED.

LT OIL MED OIL HVY OIL

SHADOW/R™ BURGUNDY

Only from Columbia 300, The Shadow/R™ is designed to extend your break point while still providing heavy backend snap. With Flexcel™ blended reactive urethane coverstock by BASF, the Shadow/R™ is destined to be a top performer for any bowler - at a moderate price.

- CHARACTERISTICS: 5/8" THICK FLEXCEL™ BLENDED REACTIVE URETHANE BY BASF. THIS RESIN HOOKS ON MEDIUM TO HEAVY OIL CONDITIONS WHEN SANDED. COMES POLISHED FOR HARD BACKEND REACTIVE FLIP.

LT OIL MED OIL HVY OIL

BLUE PEARLIZED SHADOW™

This modestly priced, mildly reactive urethane ball is a top performer. The Blue Pearlized Shadow™ is the perfect ball for the beginning bowler who wants the performance of urethane.

- CHARACTERISTICS: 5/8" THICK IMPROVED MILDLY REACTIVE URETHANE FORMULA AT A MODEST PRICE PROVIDES THE BEGINNING BOWLER WITH CONTROLLABLE HOOK ON DRY LANE CONDITIONS AND THE HITTING POWER OF REACTIVE URETHANE.
