

# ROCK'S GREATEST HIT YET.

Talk about a hit single. The Classic Rock sets the beat when it comes to power and performance. Designed for most common house lane conditions, the Classic Rock consistently delivers heavy-metal like hits. Also, its specialized core maximizes roll and power for incredible pin-splitting action. So if you want to play loud and proud, get the ball that really sings — The Classic Rock.

# CLASSIC Rock™

The new Columbia 300® Classic Rock™ features the TEC<sup>2</sup>™ (patent pending) shell with its microscopic particles to bite through oil for more hook. This low Rg (2.518) and medium-low differential Rg (.042) creates a ball with a lot of midlane reaction and strong arcing backend for control at the break point. This ball will perform well when the bowler needs a ball to get into an early roll with controllable ball motion.

## TECHNICAL INFORMATION

Texture Energy Control

### FEATURES: BENEFITS:

<b>CORE TECHNOLOGY:</b>	Dense polymer core.	High density center core promotes early roll. Medium-low differential Rg creates control at the break point with continuous backend hook.
	Bottom flip block.	High density bottom flip block creates more midlane roll.
<b>COVERSTOCK:</b>	TEC <sup>2</sup> Coverstock incorporating reactive cover with an enhanced lane-gripping additive.	Polishes easily which provides maximum versatility. Most aggressive coverstock Columbia 300 has ever developed.
<b>HARDNESS:</b>	75-78	ABC/WIBC approved.
