

PRETTY. DEADLY.

THE CUDA IS BACK.

Only this time it's dressed to kill. Introducing the Cuda 2000™ - a lethal combination of beauty and brawn. This pin crusher features our new Holo-Flex™ shell so it goes farther and grips the lane like never before. And we've incorporated a flip block with our exclusive core-in-a-core technology for maximum snap on the backend. It's a deadly combination that lets you move inside when the heads break down with a reaction that powers down the lane and hooks back to the pocket. The Cuda 2000. Easy on the eye. Hard on anything that gets in its way.

CUDA™

2000

The new Cuda™ 2000 features a brand new, revolutionary reactive shell. The new shell, called Holo-Flex™ contains a new engineered additive. This new, synthetic additive has a high aspect ratio, which means that it is much longer in one direction than another. This allows the soft, sparkly additive to extend above the ball surface giving it a unique texture. The new reactive shell exaggerates the normal reactive ball motion. Holo-Flex™ gets down the lane even better than reactive and then flips harder at the break point. The Cuda 2000 will allow bowlers to move inside as the heads break down with a motion that gets down the lane easily and hooks with a strong reaction back to the pocket.
