

We combined the best of the wildly successful Messenger Ti™ with our highly aggressive TEC™ shell. The result? The Messenger TEC. Inside out, this ball delivers. We start with a hardened Titanium nugget in the center for more hitting power. Then we surround the nugget with our proven Messenger Ti core. This unique design creates a medium-low Rg (2.547) and medium-high differential Rg (.042) for 4-5 inches of flare. We don't stop there. Next we surround the core with a modified TEC shell containing suspended glass particles for added hook. When all is said and done, you get a ball that obtains an early, arcing break point even in oil. If you thought the Messenger Ti couldn't get any better, we have a message for you...the Messenger TEC.

TECHNICAL INFORMATION

FEATURES:

BENEFITS:

CORE TECHNOLOGY:

Fired, undrillable Titanium ceramic core

This dense Titanium ceramic core concentrates mass at the center of the ball, generating more rotation off the bowler's hand, which equates to more hook potential

COVERSTOCK:

TEC Coverstock incorporating reactive cover with suspended particles

Small suspended particles help the ball hook in oil but retain enough energy for a strong arcing backend.

HARDNESS: 75-78

ABC-WIBC Approved

TECHNICAL SPECIFICATIONS:

DYNAMIC PROPERTIES

Weight	Rg	Diff. Rg
16 lb.	2.547	0.042
15 lb.	2.567	0.049
14 lb.	2.595	0.055

HOOK RATING

Ball	Hook Boards*
Messenger TEC	22
Messenger Titanium	17

*Boards of hook for average speed and rotation.

TRACK FLARE:
4" to 5"

ORDER INFORMATION:

AVAILABLE WEIGHTS:
12-16 lbs.

ITEM NUMBERS:
N56-48

COLOR:
Blue/Red/Yellow with Gold engraving

FACTORY FINISH:
600 grit sheen finish
