Reaction	Strong Continuation
Veneer	Bend-It Solid
Surface	500, 800 Abranet™, 1000, 2000 Abralon®
Core	Capsule core with Magnetite
Lane Type	Heavy – Medium Oil
Weights	12-16 Pounds

BEND-IT SOLID

Bend-It Solid was first used on the Omen, an extremely aggressive pearlized ball that likes oil. The Oath features a solid version of Bend-It that has been modified to react stronger in the mid-lane and through the back of the lane than the pearlized version. We modified the cover composition to provide the strong reaction where you want to see it.

CAPSULE CORE

The Capsule core was designed to provide great performance and versatility, while also being very simple. A basic symmetric shape with great performance characteristics was chosen in order to be very driller and bowler friendly. The low RG Capsule revs up early and the high Differential helps create a large amount of flare for great continuation in the backend.

WHAT TO EXPECT

Strikes... and lots of them! The reaction shape of the Oath is sure to be a favorite with all styles. The Oath has a strong core and cover combination that provides ease through the front of the lane, strong mid-lane, and back end where you like to see it most.
