

## Step up to the big league.

### INTRODUCING THE NEW SPORT BALL™ FOR THE NEW SPORT LEAGUE.

If you're competing on the new Sport Condition, you need the new Sport Ball. Designed specifically for the Sport Condition, the Sport Ball performs better where more oil has been applied on the outside boards reducing your entry angle. With the Sport Ball, you can easily clear the front part of the lane while producing a smooth, arcing backend reaction. Additionally, the coverstock is a modified version of our proven TEC™ particle shell which allows you to play further outside the lane, thereby increasing your entry angle. In short, you increase your control, performance, and power. With the new Sport Ball, you can bring your "A" game to the Sport Condition.

[www.columbia300.com](http://www.columbia300.com)

Columbia 300® is proud to introduce a ball that will give you the competitive edge you need when competing on the new Sport Condition. It's appropriately called Sport Ball™. The new Sport Condition requires more oil be applied on the outside boards, as compared to traditional lane conditions. The result is less swing area when you go away from the pocket, reducing your entry angle. The Sport Ball was developed specifically for these types of lane conditions, in addition to any lane condition where control is the key to higher scores. The Sport Ball will easily clear the front part of the lane while producing a smooth arcing backend reaction. A key ingredient is the revolutionary core, designed for maximum control. The core creates a .037 differential Rg, which produces low to medium flare potential. It has a medium Rg of 2.544. The coverstock is a modified version of our proven TEC™ particle shell. It has a lighter loading of glass particles and the shell is factory polished. This will allow the bowler to play further outside on the lane, increasing entry angle. Are words like Control, Predictability, Performance, Power what you're looking for in your next bowling ball? Then Sport Ball's the one for you. If you've made the commitment to step up to the more demanding Sport Condition, then step up to the new Sport Ball from Columbia 300.

## TECHNICAL INFORMATION

### CORE TECHNOLOGY:

#### FEATURES:

Dense Polymer Core

Bottom Flip Block

### COVERSTOCK:

Polished TEC™ with reduced Particle Loading

### HARDNESS:

75-78

#### BENEFITS:

Results in a medium Rg for more length and medium low differential to reduce overall hook.

Creates a smoother arcing motion at the break point for more control.

Allows bowler to play further outside, increasing the ball's entry angle.

ABC/WIBC approved.

### TECHNICAL SPECIFICATIONS:

#### DYNAMIC PROPERTIES

Weight	Rg	Differential Rg
16 lb.	2.544	0.037
15 lb.	2.573	0.037
14 lb.	2.609	0.037

**Track Flare:**  
3" to 4"

#### TECHNICAL BALL INFORMATION

	Hook Rating (Boards of hook)	TEC Rating* (End of Oil) (End of Lane)	
<b>SPORT BALL™</b>	<b>20</b>	<b>9</b>	<b>35</b>

All balls were tested with the finish that comes from the factory. \*TEC™ rating is the percent decrease in kinetic energy. The TEC rating is an indication of the energy transferred from kinetic (forward velocity) to rotational (hook). The higher the TEC rating the more hook up to that area of the lane.

### ORDER INFORMATION:

**AVAILABLE WEIGHTS:**  
12-16 lbs.

**ITEM NUMBER:**  
W06-48

**COLOR:**  
Maroon with Neon Yellow Engraving

**FACTORY FINISH:**  
Polished
