

Technical Specifications

Hook Potential:	Low (10)	135	High (185)
Length:	Early (25)	130	Long (235)
Breakpoint Shape	Smooth Arc (10)	75	Angular (100)
Flare Potential:	Low (0.0)	0.050	High (0.060)
RG-average:	Center Heavy (1)	5.3 @ 15lbs	Cover Heavy (10)

Part Number:	60-105361-93x
Color:	Navy / Red Pearl
Coverstock:	Aggressive Traction Plus
RG Max:	2.600 @ 15lbs
RG Min:	2.550 @ 15lbs
RG Diff:	0.050
Asy Diff:	0.019

Performance Characteristics

The Revolution Cyber Gear has been created for international bowlers and the lane conditions they typically encounter. The Aggressive Traction Plus coverstock is finished with Rough Buff 1500 Grit Polish. The strength of the coverstock comes through on the back-end, for oilier conditions, or in the mid-lane for medium oily conditions, where it holds to the lane and creates a driving force through the pins. The Revolution Zone Cross Medium RG core that creates high flare potential. The Zone Cross core, combined with the Aggressive Traction Plus coverstock work together to create a ball that will be clean through the front part of the lane, with great response on the back part of the lane. The coverstock is very versatile and can be used over a wide variety of lane conditions by adjusting the surface of the ball. Bowlers will find this ball to be a great tool when the conditions require a strong back-end reaction.

Layout Techniques

The Revolution Cyber Gear can be drilled like other standard two-piece ball designs. With an RG Differential of 0.050 this ball has the potential to create a higher amount of track flare for most bowlers. Bowlers with average physical games can use stronger leverage type layouts to get good reaction on medium conditions and label type layouts on drier lanes. Bowlers with stronger physical games can also use leverage layouts on medium-dry conditions and label type layouts with the pin above the fingers to get the ball down the lane while maintaining a strong backend reaction on drier lane conditions.
