RG Min	2.505
Differential	0.052
Asymmetric Diff	0.013
RG Average	4.1
Hook (1-220)	220
Length (1-235)	125
Breakpoint (1-105)	105

**Ball Motion**      Featuring the new Class 9 Hybrid Reative coverstock wrapped around the Nightmare core, the Endless Nightmare skids through the front gripping the mid-lane and turning over on the backend for the most total hook potential of any DV8 ever on medium to oily lane conditions.

**Reaction Setup**      The DV8 Endless Nightmare can be drilled using the standard drilling techniques developed for bowling balls with asymmetric cores.

**Ball Maintenance**      To reduce oil absorption and remove dirt from the surface of the ball, clean your ball with a cleaner designed for reactive bowling balls.

**Warranty Info**      All DV8 bowling balls have been manufactured to the highest standards of workmanship and material in the bowling industry, and we warrant that they will be free of defects in materials and workmanship for a period of two years from the date of purchase.
