Ball Motion	Finished with a Royal Shine Polish, the Hooligan projects easily through the front and mid-lane, with a quick response on the backend producing a very strong skid/flip motion that drives through the pins on medium dry to medium oily lane conditions.
Reaction Setup	The DV8 Hooligan can be drilled using the standard drilling techniques developed for bowling balls with symmetric cores.
Ball Maintenance	To reduce oil absorption and remove dirt from the surface of the ball, clean your ball with a cleaner designed for reactive bowling balls.
Warranty Info	All DV8 bowling balls have been manufactured to the highest standards of workmanship and material in the bowling industry, and we warrant that they will be free of defects in materials and workmanship for a period of two years from the date of purchase.
