Ball Motion Featuring the new Class 12 Solid Reative coverstock wrapped around the Ruckus core, the Ruckus Feud tractions in the oil and revs hard on the backend for the most total hook potential of any DV8 ever on heavy oil lane conditions.

Reaction Setup The DV8 Ruckus Feud can be drilled using the standard drilling techniques developed for bowling balls with asymmetric cores.

Ball Maintenance To reduce oil absorption and remove dirt from the surface of the ball, clean your ball with a cleaner designed for reactive bowling balls after each session.

Warranty Info All DV8 bowling balls have been manufactured to the highest standards of workmanship and material in the bowling industry, and we warrant that they will be free of defects in materials and workmanship for a period of two years from the date of purchase.
