DV8 MANIFESTO

300 ISN'T JUST A NUMBER. IT IS OUR DESTINATION. SHOUTING AT A BALL WILL MAKE IT STRIKE MORE. NOTHING IS AS SATISFYING AS HURLING DANGEROUSLY HEAVY SPHERES AT STATIONARY OBJECTS—AND WATCHING X'S FILL THE FRAMES. YOU KNOW IT, WE KNOW IT. SO HERE'S TO THE BALLERS. THE LANE DWELLERS. THE ALLEY CATS. AND A NEW BREED RISING FROM THE LANES. WE ARE DV8. TONIGHT WE BOWL.

Tonight We Bowl.

WORDS & STUFF

HOOK:

It's simple: balls with higher numbers will tend to hook more. Balls with lower numbers will tend to hook less. Obviously, balls don't hook on their own—they respond to how you throw them. A hook potential of 100 will give you a fairly typical hook. Anything above that will have a stronger hook, and (do we really have to keep explaining this?) a number below 100 will have much less of a hook. Just to be crystal clear, hook numbers aren't a numerical measurement, so don't try to use the difference in hook numbers to compare the hooks of two balls. Kapeesh?

LENGTH:

This one's even simpler. It's how long the ball travels down the lane before changing direction. The higher the number, the longer it takes to reach the breakpoint (the point where the ball changes direction), and vice versa. Like the hook, this isn't an exact numerical measurement, so you can't use the difference between length numbers to figure out the exact distance between breakpoints.

WARRANTY INFO:

Look. We don't screw around. DV8 bowling balls have been manufactured to the highest standards of workmanship and material. We warrant that they'll be free of defects in materials and workmanship for a period of two years from the date of purchase. We agree to repair or replace the ball you bought if at any time during the warranty period it's found to be defective in material or workmanship.
