NITRO

The revolutionary Nitro Purple Haze delivers explosive performance on moderate to light oil lane conditions — skidding longer, hooking later and harder — providing the same power the Ebonite Nitro does on long heavy oil conditions.

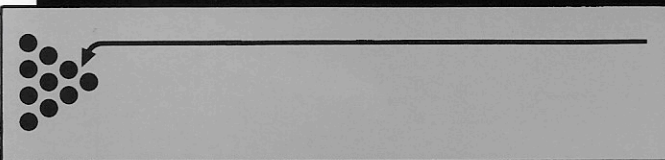

These two-piece balls have a specially-formulated urethane shell and a precisely placed Dynamic Core. The Nitro shell contains more than 11.5 pounds of high performance urethane in 14, 15 and 16 pound balls. Plus, the unique additive AJL51 delivers more surface contact with the lane than any other ball on the market. And the advanced compound HD106 creates a more powerful, harder-hitting shell that absorbs impact better than the competition. The result is a combination of the most advanced balls to be released on today's lanes, whatever the conditions.

The Nitro Purple Haze has undergone rigorous testing on a variety of lanes, passing the toughest tests of all — the PBA/LPBT players and amateurs.

12, 13, 14, 15, 16 lbs.

▲
Medium Oil

Performance Characteristics
The two-piece Nitro hooks later on long oil, rolls harder, and reduces pin deflection.

NITRO

The Nitro Blue is the most successful performance ball in Ebonite's history. The exclusive Dynamic Core gives the Nitro a precise area of concentrated weight so it skids longer, hooks later and harder.

12, 13, 14, 15, 16 lbs.

THUNDERBOLT™

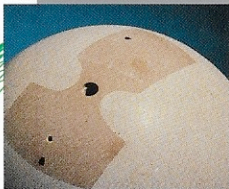

Thunderbolt™ D/B

The Thunderbolt D/B delivers incredibly accurate performance game after game. The Dual Block™ weight system's unique shape more precisely counterbalances the weight extracted by drilling, producing a more consistent, stable roll, a more predictable arc, and greater hitting power.

Every Thunderbolt D/B also features Ebonite's exclusive highly cross-linked polyurethane elastomer shell, for a more controlled hook and less pin deflection. The result: better performance potential in every frame.

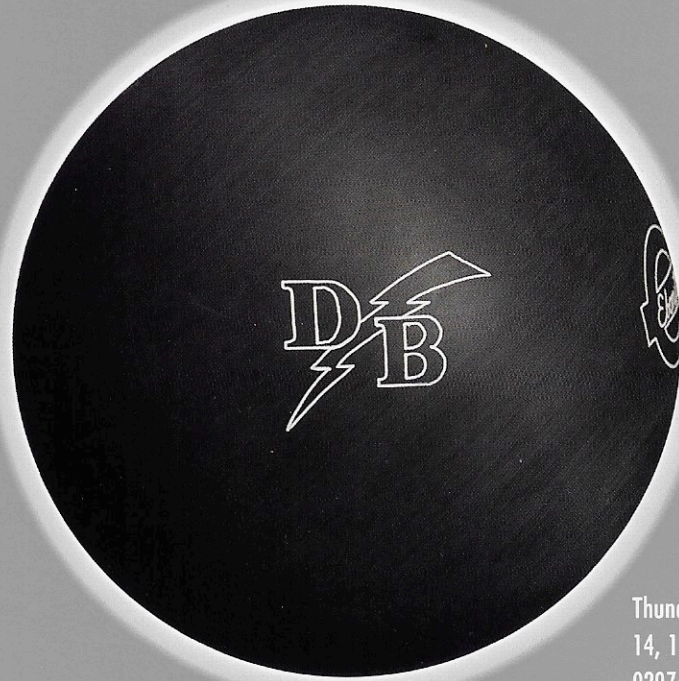

Thunderbolt™

The Thunderbolt continues to be one of the most successful balls ever rolled on the Pro Tour. Ebonite's unique urethane formula "bites" into oily lanes for exceptional control. The dynamically-balanced Power Core® increases gyroscopic action for a longer roll, sharper hook, less deflection, and dramatically more striking power. "Better" bowlers can improve their game on oily lanes. Roll the Thunderbolt.

Patented high density Dual Block™ weight displaces weight more accurately.

No extra weight in the center between finger holes and thumb hole.

TURBO

Turbo Power

The Turbo's powerful two-piece construction gives you a highly concentrated core with an extra thick shell — nearly two inches of urethane. This means a more consistent roll and greater impact, keeping pins lower for improved carry-through. The bold graphic design, vibrant colors and a great price complete this power package.

GYRO®

Gyro® I

Urethane you can afford. If you haven't bought a urethane ball because of the price, take a look at the Gyro I. 100% urethane, 100% value, it has a poly-urethane cover and a dynamically-balanced high density weight block that gives consistent balance and control. And it's priced lower than any other comparable urethane ball on the market.

Introducing Another Top Performer!

Ebonite has applied its technological expertise to create a high performance two-piece polyester ball for medium lanes. The new PINNACLE combines the exclusive Dynamic Core and a 12.8 pound polyester shell* for a ball that delivers hard back end drive with minimal pin deflection. Presented in a strikingly good-looking Sanded Light Blue Finish, this is the ball that picks up where others leave off.

** 12.8 pounds of polyester in the finished 14, 15 and 16 pound balls.*

Nitro Double-Ball Bag

For the really serious bowler. Accommodates two balls and all the accessories you'll ever need. Constructed of heavy 840 denier nylon, reinforced webbing, welded steel hardware and polyurethane foam ball cups, this bag is designed to last!

Blue/Green

Heavy-duty nylon zippers secure the roomy end pockets. A snap out accessory case, padded ball dividers and non-slip padded shoulder strap complete the look and convenience of the best bowling bag on the market.

Model #156

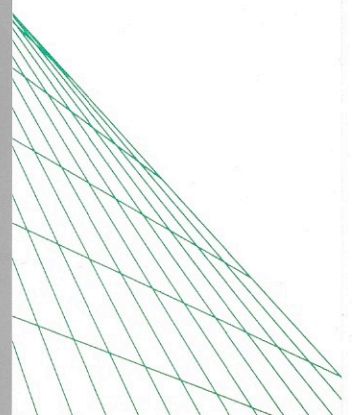

Handle Grip Bowling Ball

This specially designed Handle Grip bowling ball is for those who love to bowl, but have impaired grasping ability. The Handle Grip is also excellent for children. This unique bowling ball offered by Ebonite, has been proven in quality for the last quarter century. The ball is URETHANE construction for increased durability as well as a more predictable ball reaction on the lanes.

The spring-loaded handle design lets the bowler comfortably aim and release the ball for accuracy. The handle retracts completely flush to the ball, allowing for true roll. This ball is safe and compatible for all bowling lanes.

Bowling Balls available in: Black Urethane — 6, 8, 10, 11, 12, 13, 14, 15 & 16 lbs. (Order by weight)

One Year Guarantee against defects in materials or workmanship.

GLOVES

Wrist Positioners

The steel constructed Z-LOC™ Series provides maximum wrist support for any release position.

Simply select the wrist positioner that best suits your game or lane conditions. The Z-LOC buckle provides secure attachment to the wrist while allowing easy removal between frames.

ZL-1

Advanced Loc-Nut adjustment for quick and easy change to wrist position gives you the same release ball after ball. Adjustable for lane conditions or to pick up that single pin.

ZL-2

Straight wrist position enhances ball movement under normal to heavy oil conditions.

ZL-3

Provides a 10 degree back tilt of the wrist to make the ball go longer on light to medium oil conditions.

ZL-4

Straight wrist position like the ZL-2, with extended steel finger support for maximum lift.

Available in right hand or left hand. Small, Medium and Large.
