

EBONITE BALL CATALOG

2 0 0 2 - 2 0 0 3

WE BOWL, THEREFORE, WE ARE YOUR FRIENDS, YOUR FAMILY, THE GUY SITTING NEXT TO YOU IN TRAFFIC, THE WOMAN WHO WORKS DOWN THE HALL, THE KID WHO LIVES NEXT DOOR, THE PROFESSIONALS YOU SEE ON TOUR. THROUGHOUT OUR 95-YEAR HISTORY, EBONITE HAS HAD THE PLEASURE OF MEETING AND WORKING WITH PEOPLE WHO LOVE BOWLING AS MUCH AS WE DO. THEY ARE THE PEOPLE WE TURN TO IN FIELD TESTS TO HELP DECIDE IF A NEW BALL IS WORTHY OF THE EBONITE NAME. PEOPLE WHO APPRECIATE WHAT IT MEANS TO BOWL TO WIN.

They are known as the "True Redwoods." When Truman, Daniel and Ricky hit the lanes, they stand tall. Because even though members of the True Redwoods have bowled anywhere from a few years to twenty years, all of them have shot a perfect 300, and they're still growing strong.

TPC SERIES

Tournament players, listen up. Our new TPC (Tournament Players Choice) is Ebonite's and the industry's first high-end ball line-up dedicated to the demanding lane conditions that top-end players face in their quest to overcome tougher scoring environments, where shot-making ability rises to the top. So what's in it for all you high-revving shooters and dedicated tournament players? A combination of coverstocks and cores that combine to retain energy and provide a ball reaction that is clean through the fronts with power to burn on the backends.

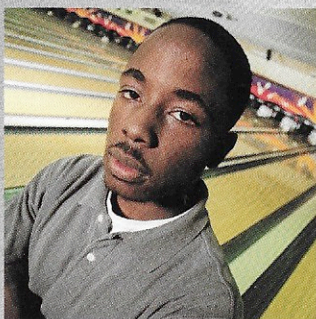

TPC WARRIOR

NEW

Style #029744 615
Neon Blue/Neon Green
Available weights: 14 / 15 / 16

The newest addition to the Ebonite arsenal will be ready for battle on August 15th. Until then, polish your armor and prepare for war.

AARON MARTIN

When Aaron Martin isn't working in the pro shop, he is perfecting his game with an arsenal of balls exclusively from Ebonite. A bowler since the age of three and Southern Scratch champ, Aaron has earned a 220 average and a lot of respect for his dedication to the game.

APEX SERIES

It all started with the original Apex, a combination of a lower load particle resin combined with an asymmetric core design to provide power, predictability and control. The evolution of the Apex series continues to provide the high-end bowler with the newest in particle technology, while precision matching the coverstocks with the signature Fusion™ core shape. Whether it be in league or tournament competition, Apex gives everything you need to stay ahead of the game.

APEX AGGRESSION

NEW

Style #029744 819

Black/Electric Orange

* Available weights: 12 / 13 / 14 / 15 / 16

Going up against heavier oiled lanes? Introducing the new ERP (Energy Retaining Particle) coverstock, allowing a higher load of particles to provide traction without the consequence of the premature loss of energy in the backends that traditionally plagues more aggressive loadings. Combined with the same explosive core that makes the Adrenaline one of the truly unique ball reactions, the Aggression will be sure to get bowlers totally stoked.

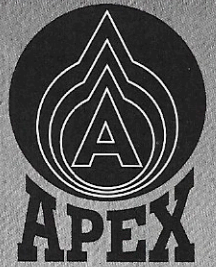

APEX ADRENALINE

Style #029744 775

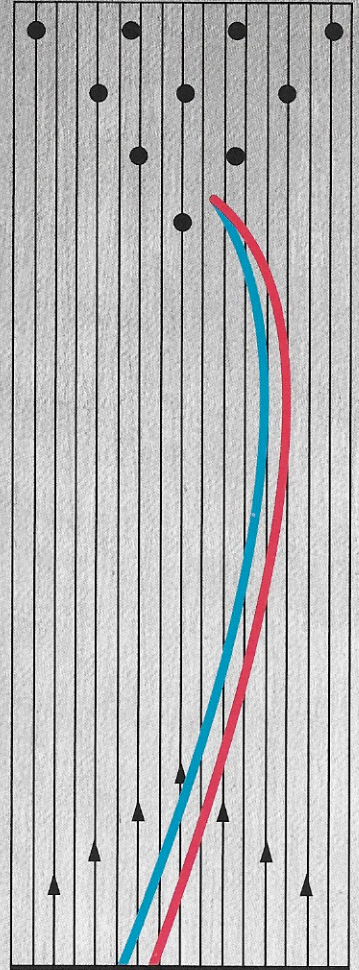

Black/Electric Pink Pearl

* Available weights: 12 / 13 / 14 / 15 / 16

Bowlers are absolutely pumped about the Apex® Adrenaline ball. With a high-flare modified Fusion™ core that shoots Adrenaline down the lane and focused energy that transforms into the strongest backend hook around, this ball sends cold chills through the competition. The best bowlers have winning in their blood and Apex Adrenaline in their bag.

APEX LANE DIAGRAM

— APEX AGGRESSION

— APEX ADRENALINE

* Lightweight cores (weights 12-13) are dynamically enhanced asymmetric designs.

MATRIX SERIES

The Matrix line combines the best in reactive resin technology with strong asymmetric designs to provide the kind of retained energy, strong breakpoint, predictability and control that higher average and professional bowlers alike demand.

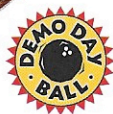

MATRIX CONQUEST

NEW

Style #029744 620
Gold'n Wine Pearl

* Available weights: 12 / 13 / 14 / 15 / 16

Overcome drier lane conditions and fresh backends with the Matrix Conquest. The pearlized Trimax Low Friction reactive resin coverstock allows Conquest's BOMB's Down, low RG, medium-high differential Fusion™ core to get down drier lanes cleaner and minimize overreaction in the backends, leaving total devastation in its wake.

MATRIX DYNASTY

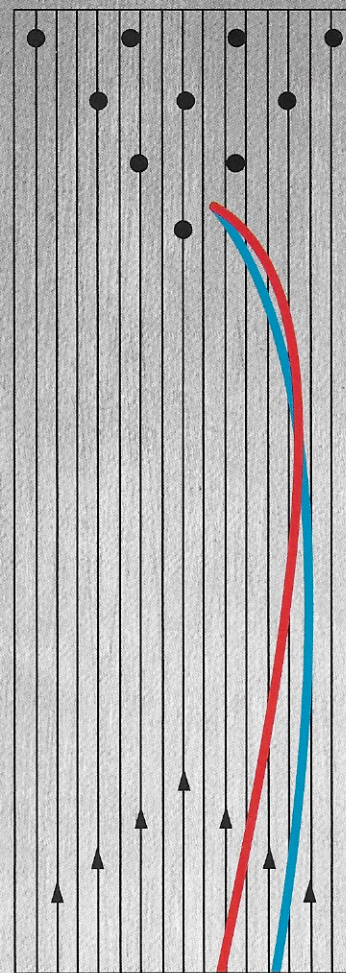

Style #029744 500
Trophy Gold/Black Sparkle

* Available weights: 12 / 13 / 14 / 15 / 16

This addition to the Matrix family allows you to assess lane conditions quickly and adjust your game with phenomenal results. The thinking that went into the Matrix Dynasty balances controllable power with predictability for peak performance in medium-light to medium lane conditions. Reach for the Matrix Dynasty when you're ready to play it smart.

MATRIX LANE DIAGRAM

— MATRIX CONQUEST
— MATRIX DYNASTY

* Lightweight cores (weights 12-13) are dynamically enhanced asymmetric designs.

TRISH MELTON

Trish Melton bowled in her first league when she was just eight years old, and she hasn't slowed down since. Just ask any of her teammates and recent winners of yet another City Championship. But if you ask Trish what she likes most about tournament play, this anchor for the Striker Wannabes will always tell you, "It's the people."

VORTEX SERIES

Are you ready to put a new spin on your game? So what do you get when you take a modified Nitro R2 core and wrap it in the same high performance coverstocks as the Matrix and Apex series? A lot of performance for less money, courtesy of Ebonite. What's not to love?

VORTEX II PARTICLE

NEW

Style #029744 705

Purple

*Available weights: 12 / 13 / 14 / 15 / 16

With its trademark center-heavy, extremely low RG core, the Vortex II Particle is one of the fastest revving, smoothest rolling balls on the market. Armed with a medium loading of silica particles suspended in Big Wheel reactive resin and sanded with 800-grit, the V2 Particle is at its best on heavy, long-oiled patterns and for faster ball speeds.

VORTEX II PEARL

Style #029744 953

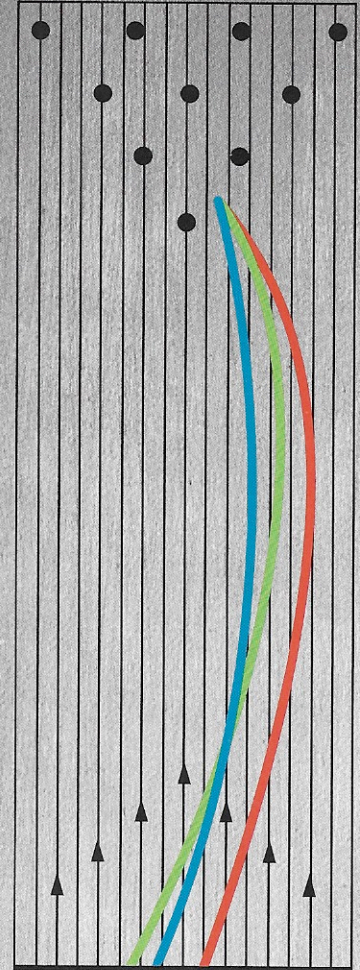

Bright Blue/Smoke Pearl

*Available weights: 12 / 13 / 14 / 15 / 16

What happens when you take one of the most versatile bowling balls on the market and wrap it with a pearlized coverstock? You get a ball with a delayed hook point that maximizes your game in wet-dry, dryer, and even broken-down lane conditions. And it looks darn good doing it. The V2 Pearl is simply big on performance, not surprises, and for just about any bowler, that's a beautiful thing.

VORTEX LANE DIAGRAM

— VORTEX II PARTICLE

— VORTEX II PEARL

— VORTEX II SANDED

VORTEX II SANDED

Style #029744 533

Black/Blue

*Available weights: 12 / 13 / 14 / 15 / 16

The success of the Vortex II Sanded has given it a reputation for being one thing – the most versatile reactive ball on the market. This center-heavy, extremely low RG version of the Nitro R2 core is designed to rev quicker and hook sooner. So, if you bowl in a center that believes in oiling the lanes down to the pin deck, put your mind at ease. The V2 Sanded is strong and steady with no surprises.

*All weights have the same core shape.

CAT SERIES

An all-time favorite of league bowlers, the Cat Series features updated versions of the familiar Turbo/X and light-bulb cores, and fuses them with high performance coverstocks to deliver superior performance and better consistency to everyone on the team. Whether Predator particle or Savage reactive, these cats are ready to attack.

PREDATOR SPARKLE

NEW

Style #029744 880
Fire Red Sparkle Particle

* Available weights: 10 / 11 / 12 / 13 / 14 / 15 / 16

The newest addition to the Predator pride is most at home on medium oil conditions. Combining the higher-flare Savage core with a light load of particles in its Trimax reactive coverstock, the Fire Red Predator Sparkle provides smooth, yet powerful, reactions that make it the choice on medium conditions for slower ball speeds or for high rev players ready to tear the competition to shreds.

PREDATOR RED SANDED

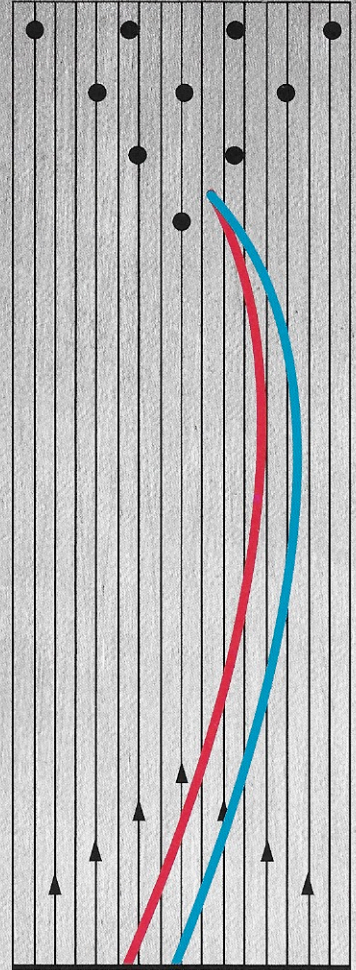

Style #029744 613
Blood Red/White Particle

* Available weights: 10 / 11 / 12 / 13 / 14 / 15 / 16

The Red Sanded's Super Tack Particle (STP) resin does the stalking. The low RG light-bulb core does the talking. Engineered for heavier oil patterns and those who need help creating hook, this 800-grit sanded, medium-load particle ball provides heavy roll and predictable backend power. Grab it and go on the prowl!

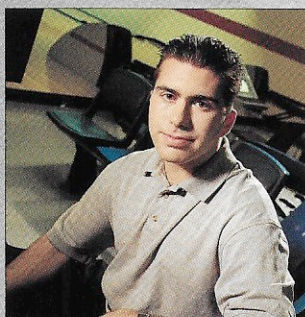

PREDATOR LANE DIAGRAM

— PREDATOR SPARKLE
— PREDATOR RED SANDED

* Predator and Savage balls (weights 10-13) utilize the Vortex II core shape.

BRAD WILLIAMS

Brad Williams and his father bowled side by side, as Brad graduated from high school to collegiate leagues. After a recent health scare, Brad's father can't bowl with him any longer, but he still enjoys watching his son. As Brad put it, "He used to take me bowling, now I take him."

SAVAGE PEARL

NEW

Style #029744 886
Purple/Blue Pearl

* Available weights: 10 / 11 / 12 / 13 / 14 / 15 / 16

Here's proof that high performance doesn't have to come at a high price. By adding a pearlescent and factory polished Big Wheel™ reactive resin coverstock to our powerhouse Savage core, the Savage Pearl claws its way down the lanes and tears into the pocket with a stronger angle of entry in light to medium oil conditions. Unleash the animal inside. Unleash the Savage Pearl.

SAVAGE SANDED

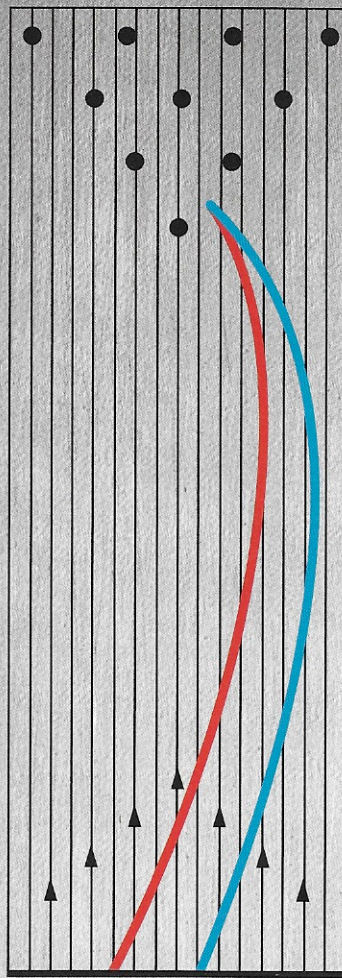

Style #029744 610
Midnight Blue/Rubine Red Sanded

* Available weights: 10 / 11 / 12 / 13 / 14 / 15 / 16

The core of the most devastating ball of its time is back with a vengeance. The medium RG Turbo/X core has been retooled for today's tighter lane conditions by adding a flare-increasing domed cap. And by adding a 1,200-grit-sanded Big Wheel™ reactive resin coverstock, Ebonite creates a ball that plays best on inside angles and in medium to heavy oil. Savage. The name says it all!

SAVAGE LANE DIAGRAM

— SAVAGE PEARL
— SAVAGE SANDED

* Predator and Savage balls (weights 10-13) utilize the Vortex II core shape.

STINGER SERIES

The Stinger series has defined the ultimate in control. Designed for entry-level bowlers looking to take their game to the next level and those competitive players who realize the benefit of predictability in the competitive arena, the Stinger balls are leaving their mark.

STINGER 2-PIECE LOW FLARE

NEW

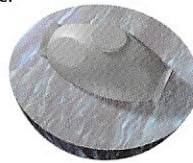

Style #029744 187

Blue/Teal Pearl

* Available weights: 10 / 11 / 12 / 13 / 14 / 15 / 16

The least flare in the Stinger lineup still delivers a big payoff on the scoreboard. Wrapped in pearlized Detonator Plus reactive resin, the 2-Pc.

Low Flare's small elliptical core provides controlled power on drier lane conditions that is sure to be a favorite among bowlers with slower ball speeds or high revs on "burnt" lane conditions. Stinger. No pain, no gain.

STINGER 2-PIECE SANDED

Style #029744 493

Black

* Available weights: 10 / 11 / 12 / 13 / 14 / 15 / 16

By using the consistent power of the Super Tack Plus coverstock, the Stinger 2-Pc. Sanded puts more "bite" into the oil, not your wallet. Sanded with 800-grit, those who bowl with faster ball speeds or on heavier oiled lanes love the added power, while the larger, elliptical-shaped core provides more track flare for a predictable transition at the breakpoint and through the pins.

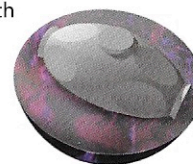

STINGER 2-PIECE PEARL

Style #029744 712

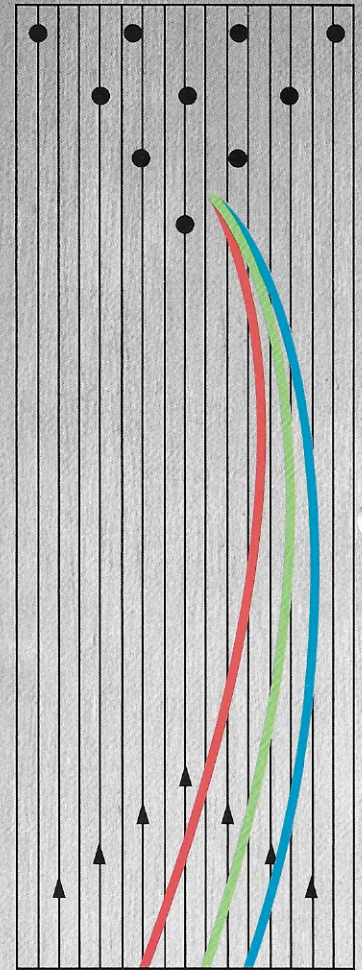

Royal/Red Pearl

* Available weights: 10 / 11 / 12 / 13 / 14 / 15 / 16

Looking for a ball that provides medium hook potential with the right amount of control? Here it is. With its factory-polished Detonator Plus reactive resin™ coverstock and large elliptical core, the Stinger 2-Pc. Pearl allows bowlers with slower ball speeds or releases with more forward roll to have a continuous hook style and experience the "sting" when this ball hits the pins.

STINGER LANE DIAGRAM

— STINGER 2-PIECE LOW FLARE

— STINGER 2-PIECE SANDED

— STINGER 2-PIECE PEARL

TORNADO SERIES

The Tornado's weight-block kicks up a storm on the backend, while its coverstock provides dependable reaction. These are the entry-level performance balls you pick up for predictable, controllable power, no matter how far your game takes you.

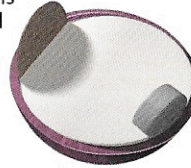

TORNADO TPS

NEW

Style #029744 736
Maroon

* Available weights: 10 / 11 / 12 / 13 / 14 / 15 / 16

Never underestimate the power of a Tornado, especially a Tornado TPS. Aside from being the industry's best value in particle resin technology, the Tornado TPS is factory sanded with 800-grit for faster ball speeds that blow the pins off the deck when there is more oil on the lanes. Batten down the hatches. There's a Tornado on the way!

TORNADO

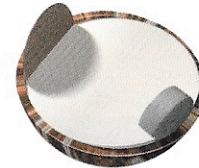

Style #029744 909
Red/Silver Pearl

* Available weights: 10 / 11 / 12 / 13 / 14 / 15 / 16

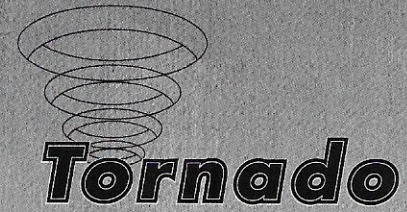

Style #029744 908
Blue/Violet Sparkle

* Available weights: 10 / 11 / 12 / 13 / 14 / 15 / 16

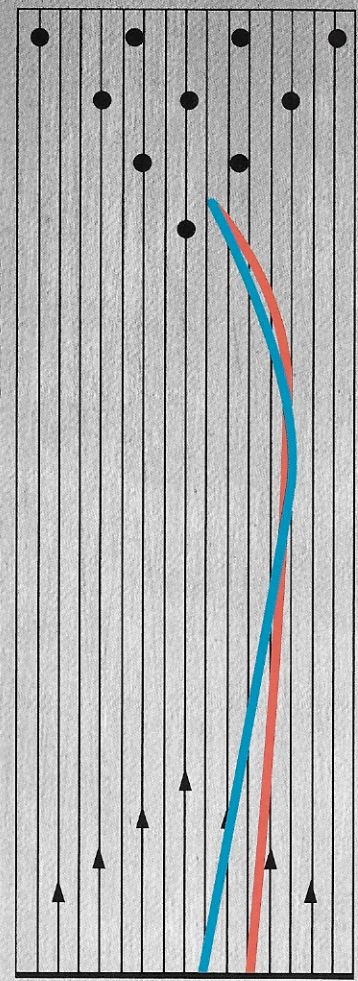

Blowing the competition away doesn't always require outspending them. When bowlers with slower ball speeds and those who wanted to attack the lanes with a straighter trajectory asked us for a ball to wreak havoc on lighter oil conditions, we took the Tornado's modified pancake core and kicked it up a notch with a higher tech weight-block for more backend punch. Then we wrapped it with the consistent power of a Super Tack Plus reactive resin coverstock that's factory polished for a one-two punch that really scores.

*All weights have the same core shape.

TORNADO LANE DIAGRAM

GYRO SERIES

GYRO PARTICLE URETHANE

NEW

Style #029744 978
Forest Green

Available weights: 10 / 11 / 12 / 13 / 14 / 15 / 16

Leave it to Ebonite to add particle to the best-selling, entry-level urethane ball of all time and still keep it the best value in bowling! The added traction from the particles imbedded in the urethane cover ensures the Gyro name will live on. And on. And on.

BUDWEISER®

We tapped into an all-time bowler favorite for our line of Budweiser balls. This three-pack is designed for all entry-level players who relish in the camaraderie of bowling while enjoying a Bud. Like the original OPTYX™ Budweiser® ball, these are the perfect bowling balls for knocking down pins and attracting lots of attention. Proof positive that Budweiser and Ebonite are still king.

BUDWEISER REACTIVE RESIN

NEW

Style #029744 971

Available weights: 12 / 13 / 14 / 15 / 16

The standard 3-pc. pancake core and Mega Bite Super Tack reactive resin coverstock of the Budweiser Reactive Resin take fun and entry-level performance to a whole new level. You'll definitely get a reaction with this cool one; it knows how to perform.

BUDWEISER BLACK POLYESTER

NEW

Style #029744 438

Available weights: 12 / 13 / 14 / 15 / 16

The elegant solid black exterior lets your friends know that you intend to run down those spares with class. With its hard polyester coverstock and 3-pc. pancake core, the Budweiser Black is designed for throwing straight at your target. It's time to show them who's boss.

BUD LIGHT BLUE PEARL POLYESTER

NEW

Style #029744 437

Available weights: 12 / 13 / 14 / 15 / 16

The bright blue pearl shell goes hand in hand with the fun and socializing of a stellar evening of bowling. You'll have the incredible ability to throw straight at your target, thanks to the hard polyester coverstock and 3-pc. pancake core. Just tell your pro shop, you'll have a Bud Light.

FUN BALLS

You've got the shoes and the attitude. Now here's an entire collection of Ebonite fun balls to match. When you're ready to get the party—and the conversation—started, get out the Ebonite and let the fun begin.

SHAMROCK

NEW

Style #029744 717

Available weights: 10 / 11 / 12 / 13 / 14 / 15 / 16

It takes more than the luck of the Irish to pick up a spare. It takes picking up one of the latest fun balls to hit the market. From St. Paddy's Day to game day, this addition to your arsenal will have the competition green with envy.

YANKEE DOODLE

Style #029744 841

Available weights: 10 / 11 / 12 / 13 / 14 / 15 / 16

See everybody stand at attention when you roll this all-American ball down the lane. Just like George Washington, this ball knows its objective and takes down anything in its way!

QUASAR

Style #029744 605

Available weights: 10 / 11 / 12 / 13 / 14 / 15 / 16

The music's going. The black lights are glowing, and we have the ultimate late night bowling ball. Quasar™ balls have built-in lights that blink on contact with the lanes—over 40,000 games of blinks per battery life. And with an attitude that the ABC can't quite approve, Quasar balls are ready to party for years to come.

HUSTLER POOL BALLS

Style #029744 744

Available weights: 9 / 10 / 11 / 12 / 13 / 14 / 15

Rack 'em up for a good time. Our Hustler balls are designed for fun with a distinctive look that sets them apart and identifies their weight. Minnesota Fats never had it so good. So put one of these babies in the corner pocket and remember why you started bowling in the first place.

MAXIM SERIES

For the bowler who puts a high priority on bowling in style, have we got the ball for you. Notice Maxim's wide variety of colors* and selection of styles. No wonder it is the most popular polyester ball in the world. You'll definitely be at the top of your game with the latest trend on the lane.

Guide to Proper Ball Selection

The below categories are meant as a guide to select the correct ball for you. Ball speed, axis rotation, axis tilt, revolutions, and lane conditions are all important criteria to consider when choosing the correct ball for you. The proper ball choice will be the one(s) that appears the most frequently in your categories. Please consult the Surface Friction Chart for the recommended surface texture for your style and lane oiling pattern.

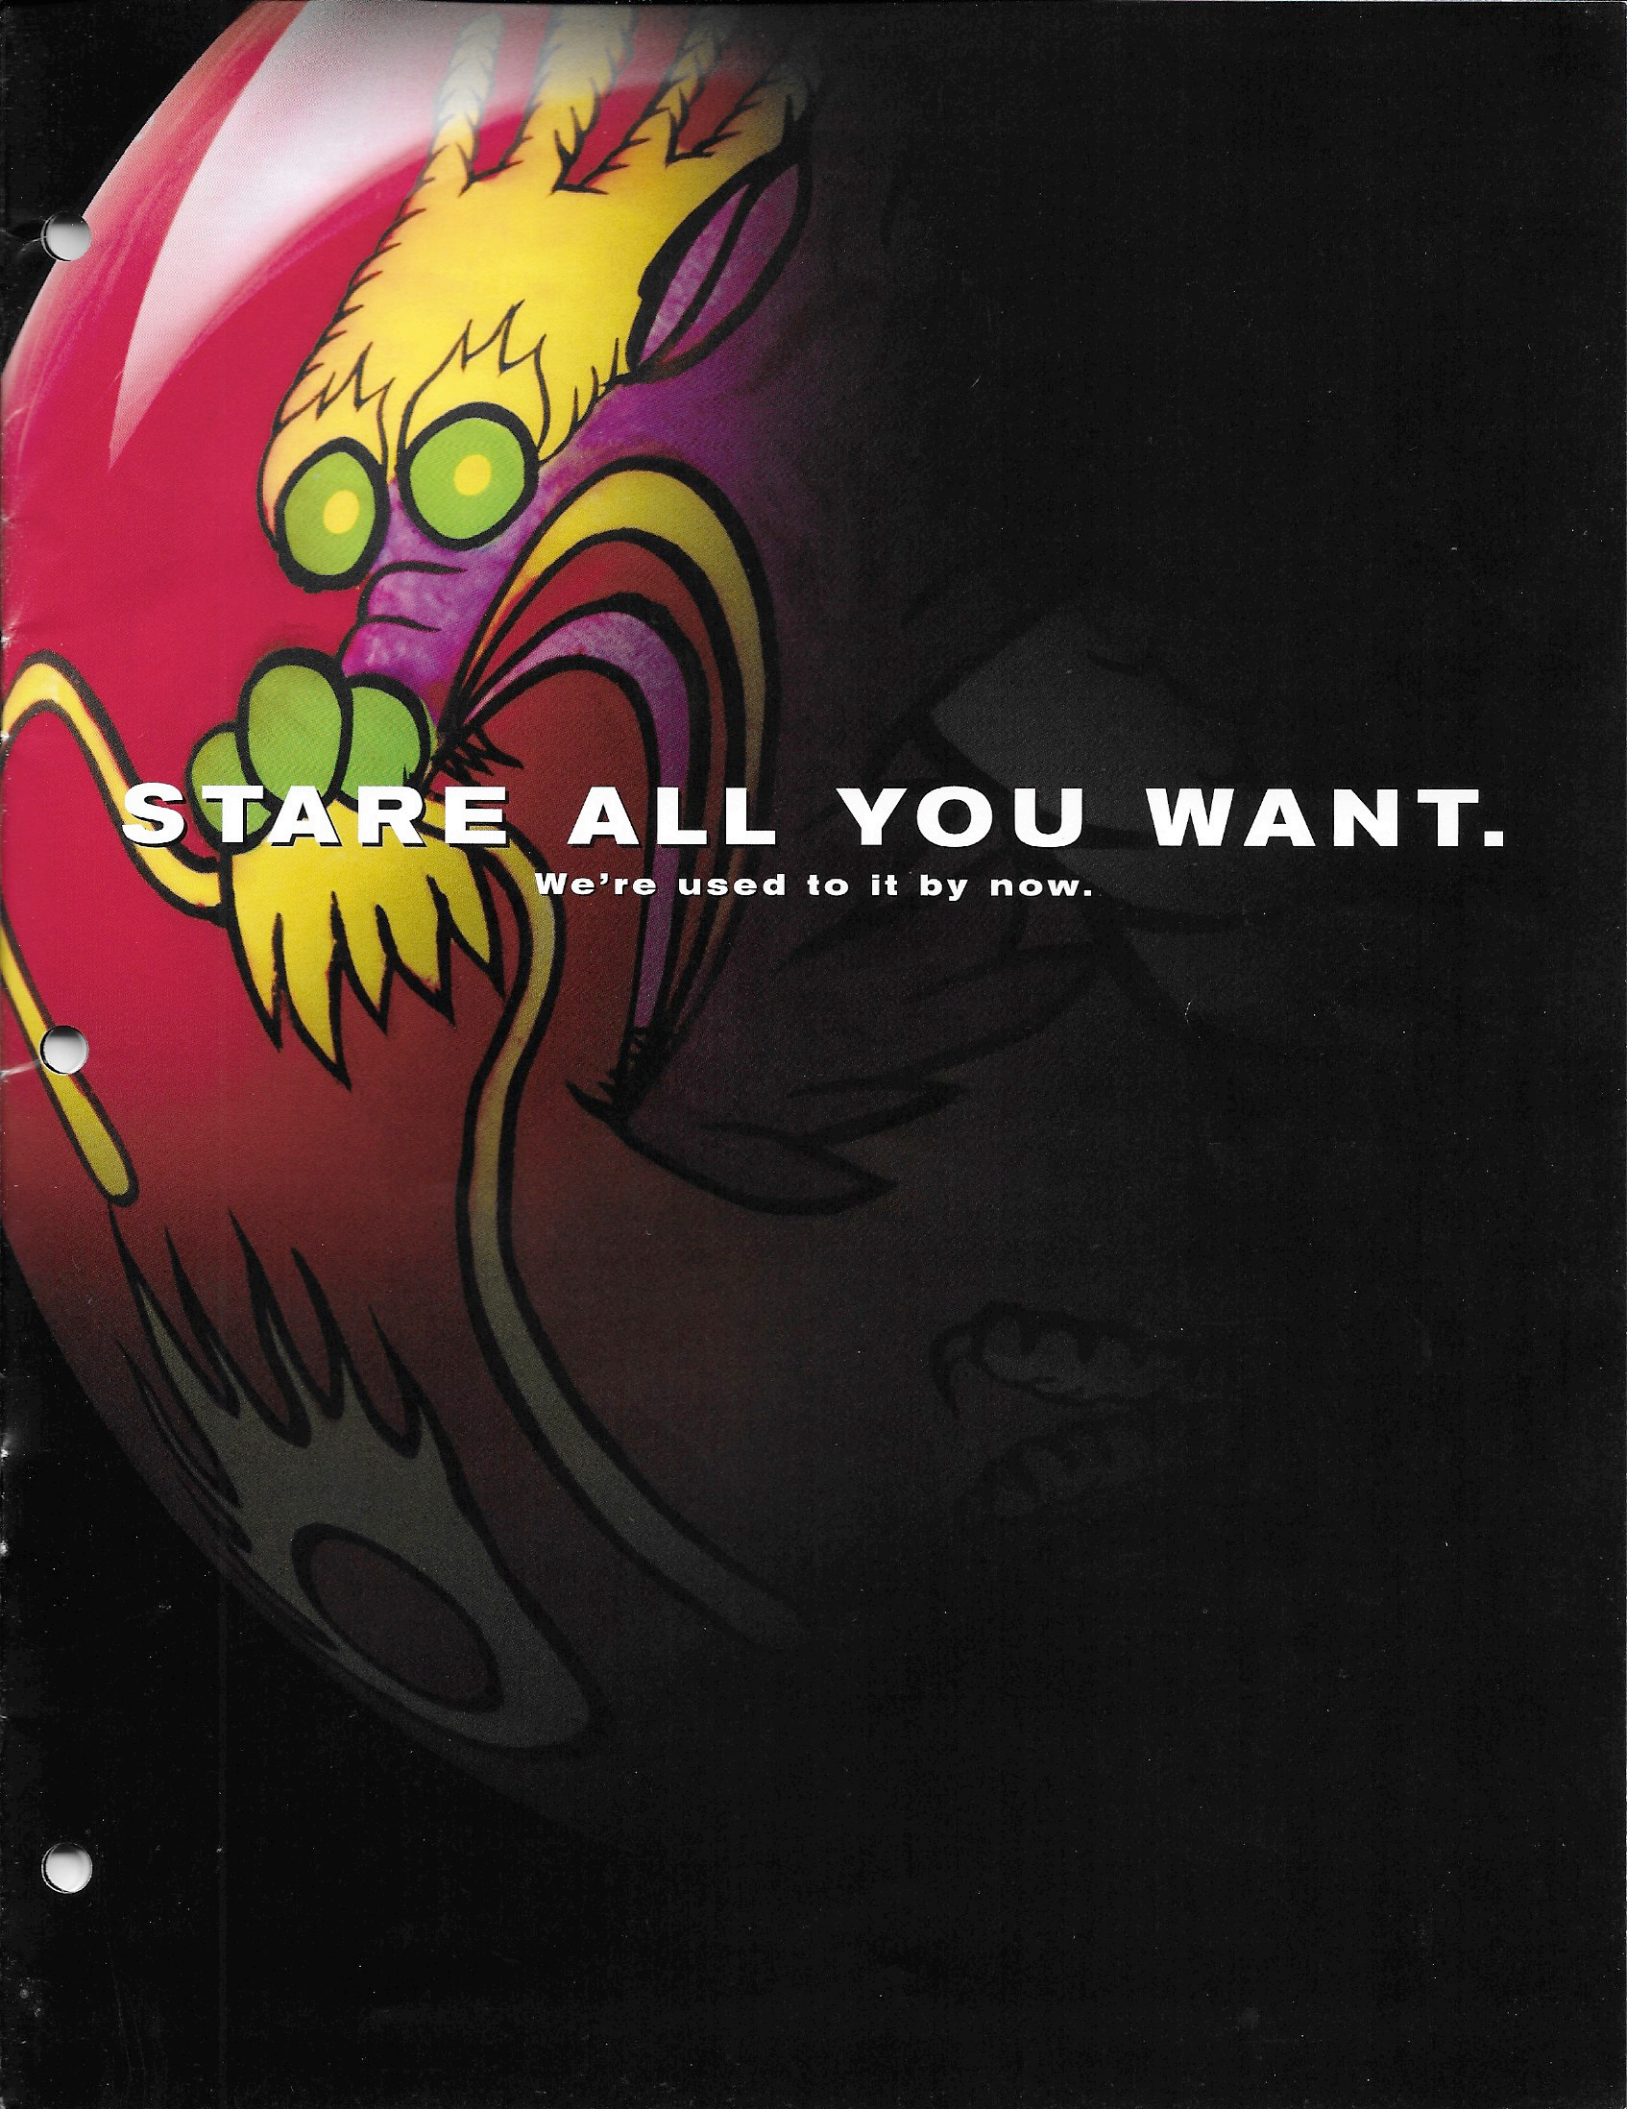

BALL SPEED Slower WHAT TO LOOK FOR Medium to High RG cores, pearl coverstocks Suggestions: Matrix Conquest, Matrix Dynasty, Vortex II Pearl, Predator Sparkle, Savage Sanded, Savage Pearl, Stinger 2-Piece Low Flare, Stinger Black Sanded, Stinger Royal/Red Pearl, Tornado TPS, Tornado Red/Silver Pearl, Tornado Blue/Violet Sparkle You may have to polish the surface to retain more energy.	AXIS TILT Low Track WHAT TO LOOK FOR Lower RG cores, higher differential cores, particle coverstocks, non-pearl coverstocks Suggestions: Apex Aggression, Apex Adrenaline, Vortex II Particle, Vortex II Sanded, Predator Red Sanded, Savage Sanded, Stinger 2-Piece Black Sanded, Tornado TPS You may have to sand the surface to create an earlier breakpoint.	AMOUNT OF OIL Heavier Oil WHAT TO LOOK FOR Lower RG cores, higher differential cores, particle coverstocks, non-pearl coverstocks Suggestions: Apex Aggression, Apex Adrenaline, Vortex II Particle, Vortex II Sanded, Predator Red Sanded, Savage Sanded, Stinger 2-Piece Black Sanded, Tornado TPS You may have to sand the surface to create an earlier breakpoint.
Faster Lower RG cores, higher differential cores, asymmetric core designs, particle coverstocks Suggestions: Apex Aggression, Apex Adrenaline, Vortex II Particle, Vortex II Sanded, Predator Red Sanded You may have to sand the surface to create more traction in heavier oil conditions.	High Track Match up to lane condition, revs, ball speed, axis rotation.	Medium Medium to High RG cores, lower differential cores, pearls Suggestions: Matrix Conquest, Matrix Dynasty, Vortex II Pearl, Predator Sparkle, Savage Pearl, Stinger 2-Piece Low Flare, Stinger Black Sanded, Stinger Royal/Red Pearl, Tornado TPS, Tornado Red/Silver Pearl, Tornado Blue/Violet Sparkle You may have to polish the surface to delay the breakpoint.
AXIS ROTATION Minimal Side Roll WHAT TO LOOK FOR Medium to High RG cores, pearl coverstocks Suggestions: Matrix Dynasty, Matrix Conquest, Vortex II Pearl, Predator Sparkle, Savage Sanded, Savage Pearl, Stinger 2-Piece Low Flare, Stinger Black Sanded, Stinger Royal/Red Pearl, Tornado TPS, Tornado Red/Silver Pearl, Tornado Blue/Violet Sparkle	REVOLUTIONS Power Player WHAT TO LOOK FOR Balls with a smoother hook pattern, balls with more length Suggestions: Apex Adrenaline, Matrix Conquest, Matrix Dynasty, Vortex II Particle, Vortex II Pearl, Vortex II Sanded, Predator Sanded, Predator Sparkle, Savage Pearl, Stinger 2-Piece Low Flare, Stinger Black Sanded, Stinger Royal/Red Pearl, Tornado TPS, Tornado Red/Silver Pearl, Tornado Blue/Violet Sparkle	BACKEND CONDITION Carrydown WHAT TO LOOK FOR Higher differential cores, aggressive coverstocks Suggestions: Apex Aggression, Apex Adrenaline, Matrix Dynasty, Vortex II Particle, Vortex II Sanded, Predator Red Sanded, Savage Sanded
Maximum Side Roll Lower RG cores, asymmetric core designs, particle coverstocks Suggestions: Apex Aggression, Apex Adrenaline, Vortex II Particle, Vortex II Sanded, Predator Red Sanded	Low/Medium Revs Higher differential cores, asymmetric cores, balls with a stronger breakpoint and backend Suggestions: Apex Aggression, Apex Adrenaline, Matrix Dynasty, Vortex II Particle, Vortex II Sanded, Predator Red Sanded, Savage Sanded, Stinger 2-Piece Black Sanded, Tornado TPS	Fresh Lower differential cores, balls with a smoother hook pattern Suggestions: Matrix Conquest, Vortex II Pearl, Predator Sparkle, Savage Pearl, Stinger 2-Piece Low Flare, Stinger Black Sanded, Stinger Royal/Red Pearl, Tornado TPS, Tornado Red/Silver Pearl, Tornado Blue/Violet Sparkle

Your eyes aren't playing tricks on you, and neither are we. Sure our OPTYX™ balls are unlike anything you've seen, but the impact they have on your game has everyone wanting to know what tricks we're up to now at Ebonite. From our thick shell Everclear™ ball that started it all to the addition of clear reactive resin to our high performance lines, Ebonite remains the innovator, never the imitator. Which is why when you bowl with the OPTYX line, all eyes are on you.

Everclear Thin Shell Polyester

There's something scary about a spare ball that can look so good and be so deadly. Clearly, the most creative collection of the OPTYX line, Everclear thin shell balls blend Ebonite technology with pure fun. Watch out for all four, especially the Snake, the industry's first-ever polyester spare ball with a three-dimensional hand-painted core.

Available weights: 10 / 11 / 12 / 13 / 14 / 15 / 16

DEMO DAYS

Ebonite continues to draw big crowds – and lots of attention from pro shop owners and managers – with Demo Days. Held at bowling centers from California to New York last year, Demo Days gives bowlers a chance to actually try out Ebonite balls on the lanes, and use some of our top-of-the-line accessories and gear. And who knows, participants may even get to test out some of our prototype balls. To find out when Demo Days will be at a bowling center near you, log on to www.ebonite.com.
