

**The game will never look the same.**

Introducing **OPTYX™**  
from Ebonite. Thanks to our  
unique breakthroughs in clear  
resin technology, **OPTYX** looks

unlike any other ball in  
the industry. And that's its  
edge. For example, take the  
reactive resin™ high  
performance **Formula 1™**

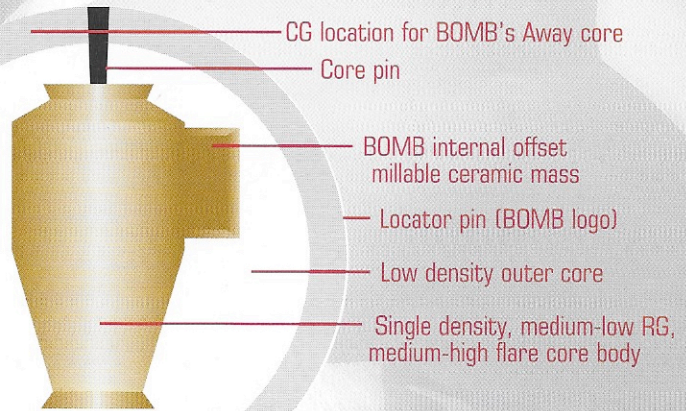

With the most powerful  
reactive formulation ever  
created by Ebonite, it's big on  
both hooking power and  
attitude – a combination  
we call "hookitude.™" Of  
course, seeing is believing.

**The Difference is Clear.™**

# The Difference is Clear.™

The people who first pioneered Everclear™ bowling balls are now taking that technology to a new, more imaginative level with the only line of clear balls incorporating the most powerful reactive resin™ available. Introducing OPTYX™ from Ebonite. Leading the way is the first high performance ball of the brand: Formula 1.™ Formula 1 combines the most powerful reactive formulation ever created by Ebonite with the most dramatic new look ever in a bowling ball. Its reflective racing flag pattern is applied directly on the actual core, under 1/2-inch of transparent, lane-grabbing reactive resin. It's a unique technology that combines great looks with great performance to produce sheer "hookitude.™" Look for more breaking news about the newest name in bowling balls. And see why the difference is clear with OPTYX.
