

DANGER

⁶⁰COBALT BOMB

Radioactive

Fusion 105 Resin

1 **Doomsday Dirty Bomb Core**
Potential Bomb Mass = 13-16lbs

A new and terrible danger for bowlers worldwide, Lane #1's Cobalt Bomb leaves a wide path of destruction on medium to drier lanes as it glides quicker and flips harder down the lane, destroying pins.

More hazardous than Uranium²³⁸ due to its long half life, the Cobalt Bomb gains its energy from the combination of our Doomsday Dirty Bomb core with an intensely radioactive Fusion 105 coverstock.

An Atomic force unmatched in bowling today, the Cobalt Bomb puts the pins and the competition in danger.

Bowl At Your Own Risk.

$^{59}\text{Co} + n \rightarrow ^{60}\text{Co} + \gamma$ (Q=7.492 MeV)
+ Doomsday Dirty Bomb Core
