

WHAT'S THE  
LANE #1 HYBRID

# DIFFERENCE

BETWEEN HARD

&

HARDEST  
HITTING..?

The Difference is the first ball with a .040 intermediate differential, thus the highest ever produced. The Difference can transition from skid, to hook, faster than any other ball to date. Not only is it the highest hooking ball for heavier oil on the market, but it also produces a different "track bowtie" location. This allows you to place the pin under the fingers, gaining the midlane traction needed, hitting pins the HARDEST.
