

THE BLACKOUT BEGINS 3/22/2023

BLACK VENOM™

LIGHT-MEDIUM OIL

The Venom line is going dark. Introducing the Black Venom, a bold upgrade to the already incredible Venom line. This uncompromising new addition features the latest Leverage cover technology from the Jackal Ambush, but with a performance adjustment for moderate oil volume. Pairing this new Leverage MFS Solid Reactive cover with the Gear APG core creates earlier read and more traction when attacking light-medium oil lane conditions.

GEAR™ APG WEIGHT BLOCK

The uniquely low RG / low Diff asymmetric Gear APG core provides performance beyond its price point and versatility in drilling that allows bowlers to create many shapes with one core. 15# RG: 2.47 | 15# Diff: .036 | 15# Int. Diff: .013 | Flare: 3"+

LEVERAGE™ MFS SOLID REACTIVE

The cover formulation found on the Venom Shock has been the gold standard for benchmark performance since the Venom Shock's release nine years ago. However, increasing oil volumes over the years has made the Venom Shock appear more angular in the opinion of most bowlers. The upgrade to Leverage MFS technology increases bite and provides the Black Venom with increased traction in the oil and a smoother motion on the lane.

4000 GRIT LSS FINISH

A 4000 grit LSS finish allows this strong cover to have more length through the front of the lane without sacrificing mid-lane traction to create a strong and smooth ball motion.
