The Magnitude 055 features a new innovation in outer core technology called **DynamiCore**. This leap in bowling ball technology is a more durable outer material that yields less compression upon impact increasing hitting power and creating an undeniable difference in sound and pin carry. **DynamiCore** is blue and will be noticeable when drilling into the Magnitude 055.

The **Magnitude 055** combines our new Relativity Traction Solid coverstock with our new Magnitude High Diff symmetrical core to create a truly Big Symmetrical ball motion. The perfect ball for players looking for more hook and consistency on a variety of oil patterns, the **Magnitude 055** will produce easy length, aggressive mid lane traction with outstanding pin carry on oily to heavy oil lane conditions.
