

THE POWER LIES
WITHIN.

CORE SHAPE DETERMINES MOTION

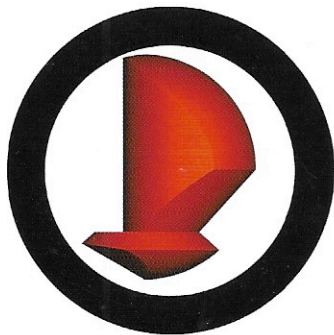

TECHNICAL INFORMATION

COLOSSUS

Colossus has a radical new core design which produces more overall hook. It's a ball that revs up sooner while maintaining axis rotation, allowing the ball to continue through the pins. **And they said it couldn't be done!** The GriPpeR EF coverstock's easy adjustability makes it simple to control the amount of hook that you desire. It reacts to lane friction immediately and accurately. It's all the hook you'll ever need.

Average RG	2.526
Differential	.049
Flare Potential	Large
Cover Stock	<u>GriPpeR EF</u> (enhanced friction)
Core Type	MOtion Tuned Free-Form
Core Dynamics	Strongly Enhanced Mass Bias
Ball Structure	Single Density Core, Dual Shell
Factory Finish	500 Compound
Ball Color	Black with Silver Logo

COLOSSUS
AVAILABLE WEIGHTS: 13-16

Designer's Warning:

The **Colossus** is manufactured with a compound finish because it may hook too much for many players with a dull surface.
