

# Beware! This ball **HOOKS.**

(Use compound or polish to delay and/or reduce overall hook, if desired.)

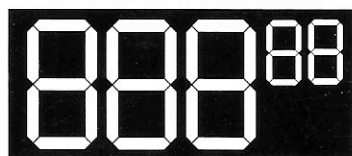

The COLOSSUS SUPREME has it all. The successful and popular Colossus shaped core, now featuring our most dense torque block ever, surrounded by our most aggressive, hook retaining coverstock ever, GRABBER. This SUPREME combination produces the fastest revving, most responsive, largest hooking MoRich ball to date. With this latest and final addition to the Colossus line, we are extremely confident that bowlers of various styles on a multitude of lane conditions will now have all the tools necessary to succeed. Colossus, Pearl Reactive Colossus, and COLOSSUS SUPREME: one core shape, three different torque block densities, and three completely different coverstocks, all with accurately marked mass biases. What more could you ask for?
