

**REBEL**
ZEST

Part Number: **60-104734-93x**
Color: **Black Pearl/Blue Pearl**
Coverstock: **Aggressive Neo Max**
RG Max: **2.580**
RG Min: **2.536**
RG Diff: **0.044**

Performance Characteristics

The Revolution Rebel Zest has been created for international bowlers on the lane conditions they typically encounter. The Rebel Zest features a bell shaped inner core that creates a medium RG ball with a medium-high differential RG that allows the ball to easily clear the heads and the mid-lane and be aggressive in the back-end. The Aggressive Neo Max coverstock used on this ball helps the ball clear through the front part of the lane even when the heads break down, while saving plenty of power to make a strong continuous move in the back-ends. This core and coverstock combination work together to create a ball that is very versatile and can be used on dry to medium lane conditions to provide superior reactions.

Layout Techniques

The Rebel Zest can be drilled like other standard two-piece ball designs. With an RG Differential of 0.044 this ball will create a medium amount of track flare for most bowlers. Bowlers with average physical games can use stronger leverage type layouts to get good reaction on medium conditions and label type layouts on drier lanes. Bowlers with stronger physical games can also use leverage layouts on medium-dry conditions and label type layouts with the pin above the fingers to get the ball down the lane while maintaining a strong backend reaction on drier lane conditions.
