

Reign Supreme™

Physical Properties

Reign Supreme™	
Color:	Purple/Ruby
Coverstock:	R2S™ Hybrid Reactive
Weight Block:	C.A.M.™ (Continuous Axis Migration)
Ball Finish:	1500-grit Polished
Logos:	Reign Supreme, Storm, CG, Oval Bolt
Durometer:	74-76
Flare Potential:	4"-5" (Med-High)
Fragrance:	Lava Spice
SKU:	TGH

Ball Weight	Radius of Gyration	Differential
16#	2.55	.052
15#	2.57	.048
14#	2.61	.041

Resurfacing Method:

Follow the steps below to take the ball back to "out of the box" condition. Items needed: 500-grit Abralon, a Grey Scotch-Brite™ Pad, Storm® Step Two™ Polish, a ball spinner and water. All sanding should be done on four sides of the ball. Side one - center of grip up, flip the ball 180 degrees for side two, turn 90 degrees for side three, and flip another 180 degrees for side four.

1. Using the 500-grit Abralon pad, sand the ball for 15 seconds on each side.
2. Using the Grey Scotch-Brite pad, sand the ball for 40 seconds on each side.
3. Using the Storm Step Two, polish the ball on two sides for 15 seconds on each side.

Suggested Maintenance:

Storm suggests using Reacta Shine™ Reactive Ball Cleaner/Polish to clean your bowling ball after every bowling session.

To touch up the surface, skip step #1 and use step #2 and #3 only. Storm suggests using step #2 and #3 from above, every 20-30 games. Use all steps every 50-60 games. This will increase longevity and create a more consistent reaction for your new Storm bowling ball.
