

# Technical Specifications

- Part Number: 60-103204
- Color: Sky Blue Solid
- Pro Traction™ Reactive coverstock
- RG Max: 2.577
- RG Min: 2.540
- RG Diff: 0.037
- RG Ave: 4.6
- Hardness: 76 - 78
- Length: 5.0
- Backend: 10.5

## Performance Characteristics

The Renegade™ features a unique core/cover combination for the Revolution line. Renegade's core is designed to produce midlane roll with medium to strong backend reaction. This is wrapped by an aggressive reactive coverstock formulated to clear the front portion of the lane while maintaining a strong reaction on the backend.

The medium differential core will be appreciated by all bowlers as a as a controllable flare option to the current high differential products on the market. As a result of the medium differential, the Renegade offers increased predictability in a variety of layouts.

## Surface and Drilling

ProTraction™ reactive coverstocks offer a buffed 600 grit factory finish that can be manipulated for greater length or earlier roll with standard sanding/polishing techniques.

Layouts for standard symmetrical core designs are recommended when drilling the Renegade. Given the medium differential core, stronger layouts can be used with greater predictability.
