

## Technical Specifications

Part Number: **60-104050-93x**

Color: **Purple Pearl Sparkle**

Coverstock: **PowerKoil LS**

RG Max: **2.543**

RG Min: **2.500**

RG Diff: **0.043**

## Performance Characteristics

The Revolution RevIZE Falcon has been created for international bowlers on the drier lane conditions they sometimes encounter. The RevIZE Falcon features a mushroom shaped, high-density inner core to produce a low average RG and medium flare potential ball.. The PowerKoil LS (Long and Strong) coverstock used on the Falcon allows the Falcon to go longer down the lane than balls that use the more aggressive PowerKoil coverstocks, while still maintaining strong backend reaction on drier lane conditions. This core and coverstock combination work together to create a ball with strong down-lane recovery with a powerful but predictable breakpoint when used on lanes with dry outside boards or drier backends.

## Layout Techniques

The RevIZE Falcon can be drilled like other standard two-piece ball designs. With an RG Differential of 0.043 this ball will create a medium amount of track flare for most bowlers. Bowlers with average physical games can use stronger leverage type layouts to get good reaction on medium conditions and label type layouts on drier lanes. Bowlers with stronger physical games can also use leverage layouts on medium to medium-dry conditions and label type layouts with the pin above the fingers to get the ball down the lane while maintaining a strong backend reaction on even drier lane conditions.
