

## Technical Specifications

Part Number:	<b>60-104542-93x</b>
Color:	<b>Red Pearl/Purple Pearl</b>
Coverstock:	<b>Activator Plus</b>
RG Max:	<b>2.513</b>
RG Min:	<b>2.463</b>
RG Diff:	<b>0.050</b>

## Performance Characteristics

The Revolution Rev Command Soldier has been created for international bowlers on the lane conditions they typically encounter. The Rev Command Soldier features an ultra-high density inner core that creates an Ultra-low RG ball with a high differential RG. Combined with the delayed reaction of Activator Plus pearlized coverstock, the Rev Command Soldier clears the front of the lane easily while reacting strong and continuously in the mid-lane through the back-ends. This core and coverstock combination work together to create a ball that is very versatile and can be used on medium-dry to heavily oiled lane conditions and provide superior ball reaction.

## Layout Techniques

The Rev Command Soldier can be drilled like other standard two-piece ball designs. With an RG Differential of 0.050 this ball will create a large amount of track flare for most bowlers. Bowlers with average physical games can use stronger leverage type layouts to get good reaction on oilier conditions and label type layouts on medium to medium-dry lanes. Bowlers with stronger physical games can also use leverage layouts on oilier conditions and label type layouts with the pin above the fingers to get the ball down the lane while maintaining a strong backend reaction on more medium to drier lane conditions.
