

## Technical Specifications

### **Rebel ProSeries**

#### **Danny Wiseman Signature Ball**

**Part Number: 60-103580-93x**

**Color: Black Sparkle**

**Coverstock: Extra Length Reactive**

**RG Max: 2.560**

**RG Min: 2.510**

**RG Diff: 0.050**

## **Performance Characteristics**

The Revolution ProSeries has been created for international bowlers on the lane conditions they typically encounter. The Danny Wiseman signature ball features a doorknob shaped core that creates a medium average RG ball which allows the ball to read and respond aggressively in the mid-lane and backend. The Extra Length Reactive coverstock used on this ball ensures that it will be clean through the front part of the lane, even when the heads start to dry out. This core and coverstock combination work together to create a ball that is very versatile and can be used over a wide variety of lane conditions to provide superior reactions.

## **Layout Techniques**

The Danny Wiseman signature ball can be drilled like other standard two-piece ball designs. With an RG Differential of 0.050 this ball can be tailored to match a wide variety of bowlers. Bowlers with average physical games can use stronger leverage type layouts to get good reaction over a wide range of conditions. Bowlers with stronger physical games can use label type layouts to get the ball down the lane while maintaining a strong backend reaction on medium to drier lane conditions.
