©2000 Revolution Bowling

# Revolution.

**Resist conformity. Defy convention. Test the limits.**

Ultra-advanced combinations of high-tech coverstock technology and high-performance core design, proven on international lanes, from demanding league play to high-pressure tournaments and title matches.

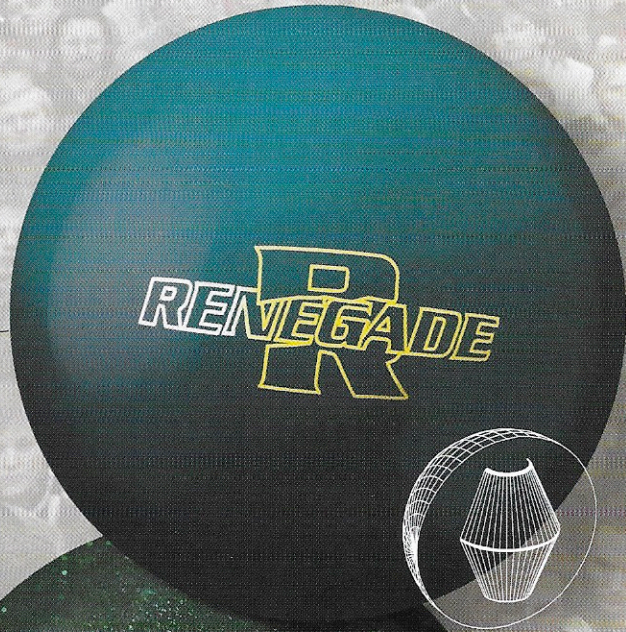

## High-Performance.

### Rebel™ ECX

**The Revolution has a new leader.**

The first to be different, Rebel has ECX™ (Elliptical Cross Section). This new core technology — the only elliptical asymmetric core in bowling — provides unparalleled ball-to-ball consistency. Allowing more aggressive, higher RG pin positions. To help get through the front end. To deliver a wider range of back-end reactions. The result: a ball custom-fit to the bowler.

Rebel ECX Midnight Navy / C60 R (reactive) Coverstock /  
Hook Potential: 19.5-11.5 (dull/shiny) / Length: 5.0 / Backend: 12.5 / RG Max: 2.580 /  
RG Intermediate: 2.564 / RG Min: 2.536 / RG Diff: 0.044 / Asymmetric Diff: 0.016 /  
12-16 lbs. / 60-103236

## Power-Performance.

### Renegade™. Outside the norm.

The choice of power players because it clears the front end with enough energy for a strong backend reaction — yet minimizes overreaction.

Renegade Sky Blue Solid. / Pro Traction™ Reactive Coverstock /  
Hook Potential: 17.5-9.0 (dull/shiny) / Length: 4.0 / Backend: 11.0 / RG Max: 2.577 /  
RG Min: 2.540 / RG Diff: 0.037 / RG Avg: 4.6 / Weights: 10-16 lbs. / 60-103204

## Mid-Performance.

### Vengeance™.

**Bowling well is the best revenge.**  
The favorite when heads and mid-lane are overreactive; the ideal alternative to stronger cover/core combinations.

Vengeance Hunter Green Sparkle. / Pro Traction™ Reactive Coverstock /  
Hook Potential: 18.5-10.5 (dull/shiny) / Length: 5.0 / Backend: 11.0 / RG Max: 2.648 /  
RG Min: 2.615 / RG Diff: 0.033 / RG Avg: 6.6 / Weights: 10-16 lbs. / 60-103205

Clash Pink / Purple / Teal  
6, 8, 10-16 lbs. / 60-103241

Clash Pink / Blue / Green  
6, 8, 10-16 lbs. / 60-103239

Clash Orange / Red / Yellow  
6, 8, 10-16 lbs. / 60-103240

**Plastic.**

**Clash.™ Polyester Balls.**

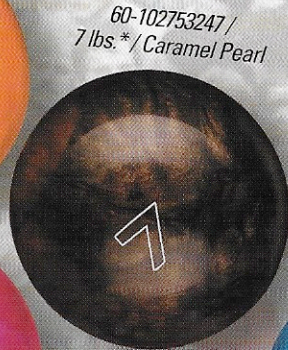

For the straightest distance between two points.

**House Balls.**

Glow in the dark house balls. In a variety of weights and colors. Urethane and plastic.
