### *Reaction Characteristics*

In the all new *Rev UP* series, Revolution Bowling engineers have combined superior technology used in our high performance line to produce a promotional reactive urethane masterpiece that puts the finishing touches on this all new line of urethane bowling balls.

The *Rev UP* ball has been designed and is perfect for medium to dry lane conditions and the entire spectrum of bowler styles.

### *Notes on Drilling*

All weights of the **Rev UP** can be drilled using the techniques developed for two-piece balls. See the attached "Seven Popular Layouts" for detailed drilling information. Note: For this 3 piece ball treat the heavy spot as a combination heavy spot and pin.
