

THE DAWN OF A NEW DAY

Since the dawn of the 21st Century no one can compete with the success that Roto Grip® has had in the mid-price category. The introduction of the all-new HORIZON™ reinforces that truth by building upon the legacy that the Retro™ Line and the RST™ Series have established.

Featuring the new Helios™ weight block, this unique design delivers a lower RG and medium differential for consistent mid-lane motion along with an angular move off the spot. The single density core guarantees a higher coefficient of restitution for increased hitting power, even on those off-pocket hits!

We have taken the best characteristics from our past and have created the outstanding True Grip™ pearl reactive coverstock. It comes to you in a 1500 grit polish for added length and maximum energy retention at the break point on those medium patterns.

The dawn of a new era is upon you, so jump on board or get run over!
