

The transference of energy from one mass to another.
It could only be Kinetic Energy.

Discover the power of the new Kinetic Energy at www.trackbowling.com/kineticenergy.

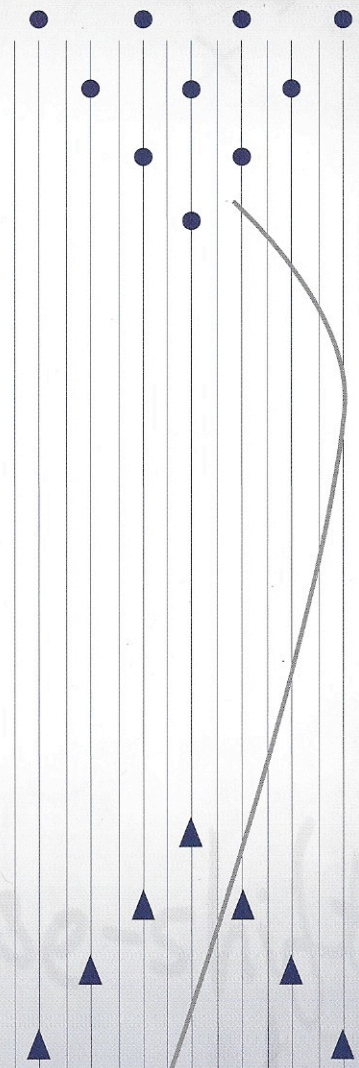

FEEL THE POWER

Kinetic Energy is the second ball in the Upper Mid Price line for Track. It features the same outstanding Shuttle core as the original Kinetic—with identical core numbers. We've wrapped the core with an all new UMP Gen 2 coverstock. This makes the Kinetic Energy the perfect ball to complement the reaction of the Kinetic. While Kinetic Energy uses the bowler's energy sooner, it still gives the huge backend you want and expect.
