

# THE NEW ENERgy SOURCE FROM TRACK.

The real power in high-tech bowling balls is finally here – the NRg™ from TRACK. This ball, which features an improved, modified 2-piece ceramic PowerTech™ Core combined with our new Versathane Plus™ Coverstock, delivers superior performance on any lane condition. The NRg™ boasts an impressive flare potential of greater than 3 1/2," even higher than most typical reactive balls, while producing a low radius of gyration. To you, the bowler, this means the most revs with the least hand action. This ball does the work for you.

Energy...that's what we created by joining the new PowerTech™ Core with the Versathane Plus™ Coverstock. If your game could use some energy get NRg.™ Contact your local TRACK dealer for NRg.™, the new power in high-tech bowling balls.

NRg™ is immediately available in a striking color combination: Reactive Burnt Orange coverstock with Fluorescent Yellow engraving.

NRg™ COMBINES THE EXCLUSIVE CERAMIC  
POWERTECH™ CORE WITH NEW  
VERSATHANE PLUS™ COVERSTOCK.
