

# USACT – Pleiades

**Part Number**  
60-104896-93x

**Coverstock**  
Reactive  
Color: Blue Pearl / Ivory  
Hardness: 77-79

**Factory Finish**  
High Gloss Polish

**Available Weights**  
12-15 Pounds

**Core Dynamics**  
**Ultra-Low-RG**

RG Max: 2.513  
RG Min: 2.463  
RG Diff.: 0.050  
Average RG: 2.6

**Performance**

Hook Potential: 135  
Length: 100  
Typical Breakpoint  
Shape: 90

**Hook Potential:**

**Length:**

**Breakpoint Shape**

**Flare Potential:**

**RG-average:**

## *Reaction Characteristics*

**In the front-ends:** The USACT-PLEIADES is clean through the heads, saving more reaction for the back-ends. This provides improved hitting power and back-end recovery while reducing sensitivity to breakdown in front-end lane conditions and lane surfaces that are less than ideal.

**In the mid-lane:** The Ultra-Low RG core used in the USACT-PLEIADES provides strong mid-lane recovery and improved traction in the oil with a smoother, more effective reaction off the dry. This combination reduces over/under reaction by making the wet play less wet and the dry, less dry, effectively allowing the bowler to create more area.

**On the back-ends:** The USACT-PLEIADES is powerful and continuous from the breakpoint through the pins. Improved traction in the oil allows the USACT-PLEIADES to bite through the carry down and aggressively change direction without breaking loose from the lane. The strong rolling characteristics of the Ultra-Low RG core make this move more readable allowing you to open up the lane.

**At the pins:** The USACT-PLEIADES creates lower, more active pin action for improved carry.

## *Utility*

•**Out of the Box:** With its High Gloss Polish surface the USACT-PLEIADES will match up well on medium-dry to medium-oily lane conditions.

•**When dulled:** The USACT-PLEIADES hooking action will increase and its arc will become more even, creating a better match-up for oily lane conditions and further smoothing over/under reactions seen on wet/dry lane conditions.
