

# Technical Specifications

- Part Number: 60-103205
- Color: Hunter Green Sparkle
- Pro Traction™ Reactive coverstock
- RG Max: 2.648
- RG Min: 2.615
- RG Diff: 0.033
- RG Ave: 6.6
- Hardness: 76 - 78
- Length: 3.5
- Backend: 11.0

## Performance Characteristics

Vengeance features a large core designed to clear the front portion of the lane while revving in the mid portion and continuing with a strong arc on the back end. Bowlers of all averages will appreciate the smoothness of the roll and the way the Vengeance melds the over/under reactions found on many of today's lane conditions.

ProTraction™ reactive coverstock compliments the vengeance core for a smooth yet aggressive roll. This powerful coverstock enhances mid lane revving action while maintaining energy for a strong back end reaction.

## Surface and Drilling

ProTraction™ reactive coverstocks offer a polished 600 grit factory finish that can be manipulated for greater length or earlier roll with standard sanding/polishing techniques.

Layouts for standard symmetrical core designs are recommended when drilling the Vengeance. Given the medium to low differential core, stronger layouts can be used with greater predictability.
